PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[RO 16,[1] Amendment 8]

MEATS, FATS, FISH AND CHEESE

A rationale accompanying this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Section 10.5 (d) is amended to read as follows:

(d) *When points must be given up.* (1) The transferor must get the points from the transferee, and the transferee must give them up, at or before the time when the transfer is made. Exceptions to this rule are stated in the next two subparagraphs.

(2) If the transfer is made through shipment by railroad or any other public carrier, the transferor may arrange to have the carrier get the points for him from the transferee at the time of actual delivery, or to have the points obtained for him by anyone in exchange for the bill of lading or other document entitling its holder to take possession of the foods.

(3) Where transfer is made by delivery to the transferee (or by shipment by railroad or any other public carrier) the points may be given up later, but not more than seven days after delivery to the transferee. However, a transferee may not accept delivery in this case unless he has points on hand (excluding points not yet surrendered for foods bought or acquired) or in his ration bank account (excluding the amounts of ration checks issued which have not yet been cleared) equal to the point value of the foods transferred. If the transferor does not get the points at or before the time he sends the foods to the transferee, he must, at or before that time, prepare and keep a memorandum showing the name of the transferee, the date he sent the foods, a description of the items, their weight and their point value. If the transferor does not get the points within seven days after delivery, he must immediately notify the district office for the place where the delivery was made, of the default. As long as the transferee is in default, he must not acquire any foods covered by this order, and no transferor who has knowledge of the default may transfer such foods to him. (However, he may continue to acquire foods covered by this order, and transferors may continue to transfer such foods to him, pursuant to Article XI.)

This amendment shall become effective April 13, 1943.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter II—Bureau of Reclamation

[No. 15]

PART 402—ANNUAL WATER CHARGES

OWYHEE IRRIGATION PROJECT, OREGON–IDAHO [1]

MARCH 23, 1943.

1. Announcement is hereby made that water will be furnished during the irrigation season of 1943 (April to October, both inclusive) for the irrigation of project lands hereinafter described, upon a water rental basis at rates and upon terms following:

For lands in the Gem, Owyhee, Ontario-Nyssa, Advancement, Payette-Oregon Slope, Bench, Crystal, and Slide irrigation districts, the minimum rental-charge for the irrigation season of 1943 for water delivered to or for the farms by government forces, will be one dollar and sixty cents ($1.60) per irrigable acre, payable in advance of the delivery of water by all landowners irrigating during 1943 a whole or a part of their respective holdings, said payment to be made by each landowner for his total irrigable area. For landowners using water during the season of 1943 the payment of one dollar and sixty cents ($1.60) per irrigable acre shall authorize the furnishing of three (3) acre-feet of water per irrigable acre. Seventy cents ($0.70) per acre-foot will be charged for any water furnished to any tract or farm unit in excess of three (3) acre-feet per irrigable acre, and shall be payable by each landowner to the district in which his land is situated within ten (10) days from the receipt by him of a statement of the excess water used. Charges for such excess water shall be payable by the districts to the United States on or before December 1, 1943. *Provided*, That, if the Gem and Ontario-Nyssa irrigation districts elect to continue operation of their pumping plants and old distribution systems at their own expense the charge for three (3) acre-feet of water delivered to or for the farms in the Ontario-Nyssa district by the district organization and for water delivered to or for the old land farms in the Gem district by the district organization, will be reduced to eighty cents ($0.80) per irrigable acre, payable in advance by each landowner for his total irrigable area and the charge for excess water payable by the landowners to the districts and, in turn, by the districts to the United States, on or before December 1, 1943, will be reduced to thirty-five cents ($0.35) per acre-foot, the measurement of water in each case to be made as stated below.

2. For lands in the Gem, Owyhee, Ontario-Nyssa, Advancement, Payette-Oregon Slope, Bench, Crystal, and Slide irrigation districts one dollar and sixty cents ($1.60) per irrigable acre will be charged for all lands the owners of which do not use irrigation water during the season of 1943. *Provided*, That, if the Gem and Ontario-Nyssa irrigation districts elect to continue operation of their pumping plants and old distribution systems at their own expense eighty cents ($0.80) per irrigable acre will be charged for all lands in the area served by district forces the owners of which do not use irrigation water during the season of 1943. Said amount of one dollar and sixty cents ($1.60) per irrigable acre or eighty cents ($0.80) per irrigable acre, whichever is applicable under the requirements of the immediately preceding sentence, shall be assessed by the respective districts on such lands during 1943 to be paid by said districts to the United States on or before December 31, 1944.

3. No distinction will be made between water pumped from the Snake River and water delivered from the Owyhee Reservoir.

4. Electric power used by the Government for pumping water delivered under this notice will be charged to the project as a whole and not to the particular districts for which water may be pumped.

5. Water will be delivered and measured by Government forces at the nearest available measuring device to the individual farm, except that in the case of the Gem and Ontario-Nyssa irrigation districts, if these districts elect to continue operation of their pumping plants and old distribution systems at their own expense, the water delivered to or for the farms by the district forces will be measured by the government at the pump outlets and at feeders from the Owyhee gravity canals.

6. PART 119—ANTI-HOG-CHOLERA VIRUS

Pursuant to the authority conferred upon the Secretary of Agriculture by section 2 of the act of Congress approved February 2, 1903 (32 Stat. 792; 21 U. S. C. 111), and by the act of Congress approved March 4, 1913 (37 Stat. 832–833; 21 U. S. C. 151–158), and in order better to effectuate the purposes of these acts, Title 9, Chapter I, Subchapter E, Code of Federal Regulations, [B. A. I. When the last full day of a tentatively satisfactory test does not end before noon, the product, after having been labeled as required by Part 112, may be released after the regular forenoon observations have been made: *Provided,* That, if, as the result of a careful examination of the test animals by a veterinary inspector at the regular forenoon observation time of the next regular workday, the test is declared unsatisfactory, the manufacturer shall immediately recall all of the product in order that it may be placed under Bureau lock.

No hog-cholera virus shall be used for inoculating pigs for the production of inoculating virus, hyperimmunizing virus as prescribed in § 118.15, or simultaneous virus as prescribed in § 118.17 and for inoculating pigs in serum tests as prescribed in § 119.33 unless it has been produced not more than 60 days prior to use and since completion has been held only in containers of the boro-silicate type or equal of high resistance and low alkalinity and which are properly marked for identification and guaranteed by the manufacturer to be acceptable to the Bureau and to meet the tests developed for determining these qualities. Other virus may be made suitable for inoculation purposes only by passing it through pigs of the same weight and in the same manner as prescribed in § 121.3. Virus derived from these pigs may be used for hyperimmunization if the animals react as prescribed in § 118.5.

(5) Section 119.4 [Reg. 19, sec. 2, par. 2] is amended to read as follows:

§ 119.4 *Hyperimmune hogs; bleedings and times.* Anti-hog-cholera serum shall be derived only from hyperimmune hogs which have been subjected to not more than four successive bleedings after each hyperimmunization. The first bleeding shall take place not earlier than 10 days after hyperimmunization, subsequent bleedings shall not take place more frequently than once in 7 days, and the last bleeding shall be made on a date not later than 38 days after hyperimmunization: *Provided,* Final bleeding may be deferred by the Chief of Bureau on special request. These hogs may be bled as aforesaid on any regular working hour of the day of bleeding. However, none shall be passed for food earlier than 10 full days after the time of hyperimmunization.

(d) *Test; conditions under which to be declared "no test for potency."* A serum test will be declared "no test for potency" when any one of the following condltions obtains, but such action will not operate to prevent a retest under the provisions of the regulations in this subchapter:

(1) When one or more of the serum-treated pigs become visibly sick on or before the third day after the time of inoculation and fail to recover within the test period.

(2) When two or all of the control pigs become visibly sick on or before the third day after the time of inoculation.

(4) When two or all of the control pigs do not show lesions of hog cholera upon post-mortem examination as described in paragraph (a).

(5) When two or all of the control pigs manifest symptoms of hog cholera within seven days as described in paragraph (a) but do not become sick to the degree described in said paragraph.

(6) When the serum-treated pigs develop during the test period symptoms of any infectious, contagious, or communicable disease (other than hog cholera) which is not caused by the serum used.

The Air Priorities Division, Air Transport Command, Army Air Forces, Annex #1, Washington, D. C., or other agencies to whom the Air Priorities Division may delegate such authority, will receive and evaluate all requests for priority and assign classifications and identification numbers thereto; and issue instructions with respect to the methods of securing and the use of air priorities. This jurisdiction extends to all passengers and cargo (including mail) on all military air transport service operated by or under contract with the Army, and on all United States commercial airlines both within and outside the United States (except those services on which the Navy Department controls priorities, see paragraph (a (1) of § 94.4). Such jurisdiction includes Pan-American Airways services in Central and South America and on the North and South Atlantic.

(3) This Directive supersedes Directive No. 4, June 4, 1942, (§§ 94.1 to 94.5, inclusive) "Priorities for Air Transportation" and amendments thereto, and contains a statement of general policies and regulations affecting air transportation priorities. Supplementary instructions and interpretations will be issued by the Chief, Air Priorities Division, as required.

(b) *Field agencies.* (1) Regional Air Priorities Control Offices are located in the following cities within the United States:

Atlanta, Ga.	Memphis, Tenn.

(2) Air Priorities Control Officers are also stationed at ports of aerial embarkation [1] in the United States and at key points outside the United States. It is the responsibility of these control officers to grant priorities as described in §§ 94.2, 94.3, and 94.4, and also to administer the air priorities program within their territories.

(c) *Types of service.* The priorities program is applicable to three general types of service. Specific regulations applicable to each type are contained in the sections of this directive indicated below:

§ 94.3 Army Contract Air Transport Service operating within the continental limits of the United States.

§ 94.4 Commercial and military service outside the continental limits of the United States.

(d) *Basic policies.* (1) Priority will be granted only when the movement of the passengers or cargo is necessary to the prosecution of the war, and when the mission of the passenger or the need for the cargo is of such urgency that transportation by air is necessary. The word "cargo" as used herein includes mail.

(2) Priorities for air transportation are granted for the purpose of accomplishing, within established time limits, a mission essential to the war effort. A

priority will not be granted for a specific flight or on a specific air carrier, unless essential to the accomplishment of the mission.

(3) Transportation of passengers or cargo for which priority has been established will be in accordance with the rules and regulations of the carrier concerned.

(e) *Classifications.* (1) Priorities will be classified for the purpose of indicating precedence for movement, in accordance with relative importance to the prosecution of the war. Classifications 1, 2, 3, and 4 are established for services described in §§ 94.2 and 94.4. Classifications A, B, C, D, and E are established for services described in § 94.3 herein. Passengers and/or cargo will be transported in the order indicated by their classifications. (See paragraph (i) of this section.)

(2) *General description of priority classifications 1, 2, 3, and 4.—Class 1* will include only passengers or cargo, the movement of which is required by an emergency so acute that precedence should be given over all other traffic and which should under no circumstances be delayed enroute for other passengers or cargo. This classification will only be granted when the urgency is such that a delay in transportation will seriously and directly impair the war effort.

Class 2 will include only passengers or cargo, the transportation of which by air is absolutely necessary to the accomplishment of a mission essential to the prosecution of the war and which is of an extremely urgent nature.

Class 3 will include only passengers or cargo, the transportation of which by air is vital to the war effort but not of an extreme urgent nature.

Class 4 will include passengers or cargo, the transportation of which is of sufficient importance to the war effort to justify transportation by air but not as urgent as those in higher classifications.

(3) Priority classifications A, B, C, D, and E, as described in § 94.3, shall be utilized to indicate the relative importance to the war effort of passengers or cargo transported on the Army Contract Air Transport Service operating within the continental limits of the United States only.

(4) To assure the transportation of extremely urgent passengers and cargo, the highest classifications (Class 1 and Class A) will be assigned only to those passengers and shipments which must not be delayed by the accumulation of other passengers or cargo. The use of these classifications will, therefore, be highly restricted.

(f) *Who may grant priorities.* This directive sets forth who may grant priorities on each of the three types of service described in §§ 94.2, 94.3 and 94.4.

(1) *Headquarters, Air Priorities Division, Air Transport Command, Washington, D. C.,* may grant priorities of all classifications and on all types of services. Field agencies of the Air Priorities Division may grant priorities of the classes and on the services as hereinafter defined.

(2) *Authorized by this directive.* Certain Commanding Officers of the Armed Forces may grant priorities under the conditions and on the services as hereinafter defined.

(3) *Authorized by "Letter of authority".* In addition to those authorized to grant priorities as stated in subparagraphs (1) and (2) above, authority may be delegated by "Letter of authority" from the Chief, Air Priorities Division, to other individuals and agencies, civilian, governmental, or military, whose duties require knowledge of the movement of personnel and cargo vital to the war effort. Such "Letter of authority" will specify the services on which priorities may be granted, the priority classifications which may be granted and conditions under which they may be granted.

(g) *Applications for priority.* (1) Persons desiring air transportation priority for passengers or cargo should make application to the governmental department or agency in the interest of which the priority is desired. Such governmental department or agency may grant the priority if it is authorized by "Letter of authority" to grant priorities of the class and on the services requested. If not so authorized, but of the opinion that the priority should be granted, the governmental department or agency will forward the request to Headquarters, Air Priorities Division, on one of its field agencies. In case of emergency, requests for priority may be made directly to Headquarters, Air Priorities Division or one of its field agencies.

(2) In making request for priorities the following information will be furnished:

(i) *For passengers.* (*a*) Passenger's name and title.

(*b*) Passenger's business or affiliation, and contact.

(*c*) Travel "from" and "to".

(*d*) Latest arrival necessary for accomplishment of mission.

(*e*) Information to justify need for priority in accordance with this directive.

(*f*) Governmental department or agency in the interest of which the travel is to be performed.

(ii) *For cargo.* (*a*) Consignor and consignee.

(*b*) Shipment "from" and "to".

(*c*) Individual through whom shipment may be located.

(*d*) Number of pieces, weight, and dimensions.

(*e*) If shipment can be divided.

(*f*) Time shipment must arrive destination.

(*g*) Information to justify need for priority in accordance with this directive.

(*h*) Governmental department or agency in the interest of which shipment is to be made.

(h) *Identification of priority.* (1) Priorities for air transportation, having been established by competent authority, will be identified to the air carrier as described in §§ 94.2, 94.3 and 94.4.

(2) *Priority certificate.* All holders of "Letters of Authority" to grant air priorities will be supplied with standard accountable forms of priority certificates by Headquarters, Air Priorities Division. A priority certificate will be prepared for each such priority granted. The original of the certificate will be issued to the passenger or shipper to establish priority status with the air carrier. Detailed instructions for the issuance and handling of certificates will be issued by the Chief, Air Priorities Division. Effective with the adoption of the standard accountable form of certificate, this form of certificate only, will be accepted for priority transportation by the carrier. (Note: The form of certificate now in use, may be used until the standard form of certificate has been furnished to all persons authorized to issue certificates.)

(i) *Precedence for transportation.* As previously stated, priority classifications are established to indicate an order of precedence for passengers or cargo to move via air transportation.

(1) The higher priority classification will have precedence. (Thus, Class 1 will have precedence over Class 2; Class A will have precedence over Class B etc.)

(2) Priority passengers or cargo will not be displaced en route by other priority passengers or cargo of the same priority classification, but will be displaced by passengers or cargo of higher priority classification.

(3) Exceptions to the normal order of precedence as described above, may be made only by Headquarters, Air Priorities Division or by an Air Priorities Control Officer thereof.

§ 94.2 *Commercial airlines within the continental limits of the United States*—(a) *Scope of section.* This section pertains to air transport service on the United States Flag commercial airlines operating within the continental limits of the United States, and to such operations from points in the United States to Canada. It does not include service on Pan American Airways or American Airlines from the United States to Mexico or other points in Central or Latin America, which are covered by § 94.4. It does not include Army Contract Air Transport Service (see § 94.3).

(b) *Priority classifications.* Priority classifications numbers 1, 2, 3, and 4 for passengers or cargo, described in paragraph (e) (2) of § 94.1, apply to this service.

(c) *Priority for air trips* requiring less than two hours and where destination can be reached by rail within six hours of desired departure time from originating point may only be granted by Headquarters, Air Priorities Division or by a Regional Air Priorities Control Office. Such priorities will be granted only in cases of extreme emergency.

(d) *Who may grant.* Subject to the limitations hereinafter set forth, priorities on the commercial airlines may be granted by the following:

(1) The President; the Secretary of War; the Secretary of the Navy; and Headquarters and Regional Offices, Air Priorities Division, may grant all classes of priorities, to any passengers or cargo qualified under this directive.

(2) Commanding Officers of units of the Armed Forces who are authorized to issue travel orders (not merely transportation requests) may grant Class 3 priority to military or civilian personnel under their command, but only through the medium of official travel orders specifically directing (as contrasted with merely authorizing) the use of military or commercial aircraft.[1] Such priority will automatically be established for the holder thereof, on authority of such orders and without a certificate.

(3) Commanding Officers of Ferrying Commands (Army, Navy or Marine Corps), or subordinate Unit Commanders, their Adjutants, or Operations Officers, may grant Class 2 priority to members of ferrying crews under their command and while on ferrying activities, but only through the medium of official travel orders specifically directing (as contrasted with merely authorizing) the use of military or commercial aircraft.[1] Such priority will automatically be established for the holder thereof, and for a total of not to exceed 100 pounds of baggage in addition to that carried free on tickets, on the authority of such orders and without certificate.

(4) Holders of "Letter of authority" may, through the issuance of prescribed form of certificate, grant priorities for passengers or cargo of the classes specifically indicated in "Letter of authority" issued by the Chief, Air Priorities Division.

(e) *Letter of authority.* "Letter of authority" to grant air priorities on commercial airline service within the continental limits of the United States may be issued by the Chief, Air Priorities Division, to commanding officers of units of the Army, Navy, or Marine Corps[2] Military or Naval plant representatives, governmental departments and agencies, and others whose duties require knowledge of the movement of personnel and cargo vital to the war effort. Such authorization will be given upon receipt of an application therefor, on a form prescribed by the Chief, Air Priorities Division, duly executed and clearly demonstrating the need for such authorization. "Letters of authority" may be limited to either passengers or cargo and will state the priority classifications that may be granted thereunder.

(f) *Identification of priority.* Priorities for air transportation will be identified to the air carrier in the following manner:

(1) *Official travel orders.* Military personnel traveling on official travel orders directing travel by air, as stated in paragraph (d) (2) and (3) of this section, may use these orders for the establishment of priority on the services covered by this section (except for such trips as are outlined under paragraph (c) of this section). The orders, or extracts thereof, will be shown to the air carrier and no certificate will be required.

[1] The inclusion of authority for the use of other means of transportation in such orders, if air transportation is not available, will not nullify the automatic establishment of priority.

[2] No "Letter of authority" is required for such commanding officers to grant priority through the medium of travel orders as authorized in paragraph (b) (2) and (3) of § 94.2. "Letter of authority" will be required for such commanding officers to grant priority other than through the medium of travel orders.

(2) *Priority certificates.* Standard form of priority certificates as described in paragraph (h) (2) of § 94.1, will be honored by the air carrier for the establishment of priority for passengers or cargo.

(3) *Verbal certification.* Verbal certification for passengers or cargo will be accepted by the air carrier only from Air Priorities Control Offices. In making such certifications, the Air Priorities Control Office will give the carrier the same information as required in the certificate.

(4) *Telegraphic certification.* Individuals authorized by "Letter of Authority" to grant priorities may certify such priorities by telegram to a passenger or shipper located in another city. Such telegrams will be of a standard form as described in instructions to those so authorized. Telegraphic certification from Headquarters, Air Priorities Division or a Regional Air Priorities Control Office, will also be honored by the air carrier.

(g) *Certificate of passenger.* Passengers for whom priority has been granted by competent authority will be required by the air carrier to sign a certificate that their mission is necessary to the prosecution of the war and that the mission is of such urgency that transportation by air is necessary on the flight concerned, unless one of the following is presented:

(1) Priority certificate.

(2) Telegraphic certification.

(3) Military orders directing travel by air.

(h) *Reservations to be made in advance.* Passengers or shippers are required to make their own reservations or arrangements for transportation with the air carrier involved. Reservations must be made as far in advance of actual departure as possible. Priorities for which reservations have not been previously made, should not be exercised within one hour of scheduled plane departure, except under extremely urgent conditions.

(i) *Cancellation of reservation.* After a priority has been established and space confirmed to the passenger, the same priority will not be honored for a subsequent flight, unless the original reservation is canceled at least three hours prior to scheduled departure of the original flight. Exceptions will be made when the passenger secures, and there is presented, satisfactory evidence of the specific approval of the Chief, Air Priorities Division, a Regional Air Priorities Control Office or the authorized person who granted the priority.

(j) *Members of Congress.* Members of the United States Senate and House of Representatives have been authorized by letter from the Chief, Air Priorities Division, to establish priorities for themselves only, on the services covered by this section, and when traveling under the provisions of this directive. Air carriers will, upon application of Members of Congress, and presentation of satisfactory identification, establish Class 3 priority and will require the Member of Congress to sign a certificate that the mission is necessary to the prosecution of the war and is of such urgency that transportation by air is necessary, and on the specific flight concerned.

§ 94.3 *Army contract air transport service within the continental limits of the United States*—(a) *Scope of section.* This section pertains to Army Contract Air Transport Service within the continental limits of the United States, and from the United States to Edmonton, Alberta, Canada.

(b) *Purpose of service.* The Army Contract Air Transport Service is intended primarily for the movement of material of the armed forces between depots and bases, and to ports of embarkation. Cargo will take precedence over passengers except in cases of emergency, as described in paragraphs (d) and (e) of this section.

(c) *Air priority control officers* will be located at principal control depots. It will be the responsibility of those control officers to make such investigations as is necessary, (1) to ascertain whether, within the meaning of this directive, specific cargo should be transported by air, (2) to administer the air priorities program as it applies to this service, (3) to establish precedence of movement for shipments within a priority classification as described in paragraph 4 below, and (4) to grant specific priorities as required. They will coordinate the use of this service with domestic commercial airline service and with other modes of transportation.[4]

(d) *Priority classifications.* Priority classifications A, B, C, D, and E are hereby established to indicate precedence for transportation on this service.

Class A. This classification is reserved for passengers or cargo which should take precedence over all other traffic and under no circumstances should be delayed enroute. This classification may be granted only by Headquarters, Air Priorities Division, by an Air Priority Control Officer, or by others specifically designated by the Chief, Air Priorities Division.

Cargo given this classification will be identified for shipment on Army Contract Air Transport Service within the continental limits of the United States only, by the marking of a large "A" in a circle on each package. Passengers will be identified by certificate.

Class B. This classification is reserved for cargo moving to a port of aerial embarkation for trans-shipment out of the continental United States via air transportation. Priority must previously have been established for shipment by air outside the United States as outlined in § 94.4. All such cargo automatically will be given a Class B priority.

Cargo given this classification will be identified by the address of the overseas consignee marked on the shipment and by the overseas air priority identification number (prefixed by "APR") which

[4] Pending the assignment of the Air Priority Control Officers at the various Control Depots, Air Freight Officers will use their discretion to prevent improper use of air transport, in accordance with instructions from the Headquarters, Field Services, Air Service Command.

will have been placed on the shipment by the shipper (see § 94.4). Priority will be indicated by the marking of a large "B" in a circle on each package.

Class C. This classification is reserved for cargo destined to a port of embarkation for shipment overseas via water transportation. All such cargo automatically will be given a Class C priority.

Cargo given this classification will be identified by the fact that it is addressed to an overseas consignee in the clear or in code, but does not carry an overseas air priority identification number. Priority classification will be indicated by the marking of a large "C" in a circle on each package.

Class D. This classification is reserved for inter-depot or other cargo destined within the continental limits of the United States. The need for the cargo must be of such urgency that shipment by air is justified in accordance with paragraph (f) (1) of § 94.1, as determined by the shipping authority. All such cargo will automatically be given a Class D priority. (Cargo not of sufficient urgency to justify air transportation as stated above, may be carried on this service, but shall not be given a priority classification and shall only be moved if space is available after all priority passengers or cargoes are moved.)

Cargo given this classification will be identified by its destination as marked on the shipment. Priority classification will be indicated by marking of a large "D" in a circle on each package.

Class E. This classification is reserved for personnel, either military or civilian, traveling on official travel orders directing, not merely authorizing, travel by military aircraft. All such personnel automatically will be given Class E priority on presentation of such orders.

(e) *Change of classification.* Cargo or passengers which are automatically granted Classes B, C, D, or E, as outlined above, may be given a higher classification when conditions exist which make such a change necessary. Such a change, however, may be made only by Headquarters, Air Priorities Division, Washington, D. C.; Air Priorities Control Officers thereof, or by others who may be given such authority in writing by the Chief, Air Priorities Division.

When it becomes necessary for cargo to be transferred from Army Contract Air Transport Service to commercial airline service, priority for movement on the commercial service will be established in accordance with the provisions of § 94.2.

The priority marking on cargo should be placed as close to the address of the consignee as possible and should also be placed on all four sides of the package, if possible, to facilitate identification enroute, in warehouses, etc.

§ 94.4 *Military or commercial service outside the continental limits of the United States*—(a) *Scope of section.* This section pertains to priorities on all military air transport service operated by or under contract with the Army and on all United States commercial airlines between the continental United States and points outside thereof, or wholly between points outside the United States, except:

(1) Services on which the Navy Department controls priorities. (As of January 1, 1943, these include Naval Air Transport Service, American Export Airlines and the Pacific and Alaskan services of Pan American Airways.)

(2) United States commercial airlines and Army Contract Air Transport Service operating from the United States to points in Canada. (Such priorities are covered in §§ 94.2 and 94.3, respectively.)

(b) *Priority classifications.* Priority classification numbers 1, 2, 3, and 4 for passengers or cargo, described in paragraph (e) (2) of § 94.1, apply to this service.

(c) *Priority for movement by air from the United States to points outside thereof,* (except as stated in paragraph (a) (2) above) shall be established only by Headquarters, Air Priorities Division, Air Transport Command, Army Air Forces Annex #1, Washington, D. C., or by Priorities Control Officers to whom such authority may be delegated.

(1) Priority must be established before passengers or cargo concerned are sent to the port of aerial embarkation.

(2) Applications for such priority should be made by or through the governmental department or agency in whose interest the priority is desired. When this is impossible, or in emergencies, applications may be made directly to the Air Priorities Division.

(3) At the time priority is established by the Air Priorities Division, passengers and cargo will be assigned a priority identification number (prefixed by the letters "APR"). Passengers will report their priority identification numbers to the air carrier at the time application for passage is made, and this number will be noted upon the order or ticket furnished to the passenger as evidence of his right to transportation. In the case of cargo, the priority identification number furnished by the Air Priorities Division must be clearly marked on each package. It will be marked in a uniform manner wherever the address appears and will immediately follow the portion of the address showing the consignee at the port of embarkation for foreign shipment.

(d) *Priority for movement from points outside the United States to the United States or between points wholly outside the United States* may be established as follows:

(1) Headquarters, Air Priorities Division and Air Priorities Control officers thereof, located at points outside the United States, may establish all classes.

(2) Commanding Generals of certain overseas theatres will be specifically authorized by competent authority to establish priorities of all classes for movement from and within the theatres under their command. This should be accomplished through the Air Priorities Control Officer in all cases where such officer is accessible.

(3) Priority classifications 3 or 4, for passengers or cargo may be established by certain other agencies specifically authorized to do so by "Letter of Authority" from the Chief, Air Priorities Division. Such "Letters of Authority" will clearly specify the extent and limitations of the authority and will ordinarily be issued only to Military Attaches at American Embassies, American Consuls, or other high government officials, or to Air Transportation Officers at certain points where no Air Priorities Division Officer is located.

(e) *Procedures for handling.* Procedures for the handling of priority passengers and cargo, after priority has been granted, will be established by the Chief, Air Priorities Division, who will issue the necessary instructions to those concerned.

Major General,

PART 1010—SUSPENSION ORDERS

[Suspension Order S–284]

ANDERSON'S, INC.

Anderson's, Inc., Nashville, Tennessee, is engaged in the motor repair and rewinding business and is also a wholesaler of various electric items and parts and supplies. The Company qualified under the Production Requirements Plan for the third quarter of 1942 and was assigned preference ratings for the procurement of material for the operations of its motor repair shop. The Company applied the ratings thus assigned to it to orders for material for its warehouse despite the fact that it was entitled to apply these ratings only to obtain production material for its motor repair shop and not material for resale in its warehouse. The Company also applied the ratings assigned to it to procure substantial quantities of material to which a rating had not been assigned on Form PD–25X and to procure other material in excess of the quantities to which ratings had been assigned. These acts constituted violations of Priorities Regulation No. 11.

The Company in reporting its shipments for the preceding period on Form PD–25X for the third quarter of 1942 certified that such shipments had been made on higher ratings than was the case, thereby obtaining the assignment of higher preference ratings and the allocation of greater material than it would otherwise have obtained. This constituted a misrepresentation to the War Production Board in violation of Priorities Regulation No. 1.

The Company also violated Limitation Order L–123 by selling and delivering certain electric motors on orders bearing preference ratings lower than A–9. The Company also applied the preference rating of A–3 assigned to it on its PD–25X form to the delivery of an electric range although no preference rating had been assigned for the procurement of this material. This constituted a violation of Priorities Regulation No. 11. Thereafter, the Company sold and delivered this electric range on an order bearing no preference rating although it was aware of the provisions of Limitation Order L–23 which prohibited such sale.

The foregoing violations of War Production Board orders have hampered and impeded the war effort of the United States by diverting scarce material to uses unauthorized by the War Production Board. In view of the foregoing, *It is hereby ordered*, That:

§ 1010.284 *Suspension Order No. S–284.* (a) Deliveries of material to Anderson's, Inc., its successors and assigns, shall not be accorded priority over deliveries under any other contract or order, and no preference rating shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders, or any other orders or regulations of the War Production Board, except as hereafter specifically authorized in writing by the War Production Board.

(b) No allocation shall be made to Anderson's Inc., its successors and assigns, of any materials the supply or distribution of which is governed by any order of the War Production Board, except as hereafter specifically authorized in writing by the War Production Board.

(c) The provisions of paragraphs (a) and (b) hereof shall not be applicable to deliveries or allocations of material required by Anderson's, Inc., its successors and assigns, for the operation of its motor repair and rewinding shop: *Provided*, That such deliveries or allocations may only be made in accordance with the provisions of all other applicable orders and regulations of the War Production Board.

(d) Nothing contained in this order shall be deemed to relieve Anderson's, Inc., its successors and assigns, from any restrictions, prohibition, or provision contained in any other order or regulation of the War Production Board, whether now in force or hereafter issued, except in so far as the same may be inconsistent with the provisions hereof.

(e) This order shall take effect April 18, 1943, and shall expire on July 18, 1943, at which time the restrictions contained in this order shall be of no further effect.

Issued this 14th day of April 1943.

PART 1078—JEWELRY

[General Limitation Order L–45]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of materials and facilities used in the manufacture of jewelry for private account and for export; and the following Order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1078.1 *General Limitation Order L–45—*(a) *Definitions.* For the purposes of this order:

(1) "Jewelry" means all articles commonly known as jewelry, used primarily for personal adornment and designed to be worn on or about the person, including but not limited to mesh bags, vanity cases, compacts, cigarette cases, watch bracelets, jewelry findings and jewelry chains, but not including watches.

(2) "Manufacturer" means any person engaged in the business of manufacturing or assembling jewelry or parts specifically intended for incorporation into jewelry.

(3) "Karat gold" means karat gold as defined in United States Commercial Standard CS67–38 (issued by the National Bureau of Standards), containing less than 40% by weight of copper. (Gold alloys containing 40% or more by weight of copper are governed by the provisions of Order M–9–c, as amended.)

(4) "Palladium" includes the total weight of any palladium alloy containing 10% or more of palladium by weight.

(5) "To produce jewelry" means for a manufacturer

(i) To perform his last manufacturing or assembling operations on jewelry. If another manufacturer later performs additional manufacturing or assembling operations on the same jewelry, such other manufacturer shall also be deemed to be producing jewelry.

(ii) To remount or change the size, shape, form or function of jewelry, even though no additional karat gold or palladium is added.

"To produce jewelry", however, does not include the following:

(iii) To size a ring for the ultimate consumer when material is removed or when material is added for the purpose of sizing alone; or

(iv) To add one or more stones, pearls, jewels or finished parts to an otherwise finished article, and to polish such article when the adding of the stones, pearls, jewels or finished parts is determined by the choice of the ultimate consumer.

(b) *General restrictions.*

(1) During the period beginning April 15, 1943, and ending June 30, 1943, inclusive, no manufacturer shall produce jewelry containing more karat gold than 18¾% of the amount of karat gold contained in the jewelry produced by him during 1941.

(2) During the period beginning April 15, 1943, and ending June 30, 1943, inclusive, no manufacturer shall produce jewelry containing more palladium than 18¾% of the amount of palladium contained in the jewelry produced by him during 1941.

(3) In addition to the amount of karat gold and palladium which a manufacturer may use during the period beginning April 15, 1943, and ending June 30, 1943, inclusive, pursuant to paragraphs (b) (1) and (b) (2) of this order, a manufacturer may use during such periods instead of the amount of platinum contained in jewelry produced by him during 1941:

(i) An amount of karat gold equal to 25% of such platinum, or

(ii) An amount of palladium equal to 10½% of such platinum, or

(iii) An amount of karat gold equal to 25% of any portion of such platinum plus an amount of palladium equal to 10¼% of the remaining portion of such platinum.

(4) During the period of three months beginning July 1, 1943, and during each succeeding period of three months until otherwise ordered, no manufacturer shall produce jewelry containing more karat gold than 12½% of the amount of karat

gold contained in the jewelry produced by him during 1941.

(5) During the period of three months beginning July 1, 1943, and during each succeeding period of three months until otherwise ordered, no manufacturer shall produce jewelry containing more palladium than 12½% of the amount of palladium contained in the jewelry produced by him during 1941.

(6) In addition to the amount of karat gold and palladium which a manufacturer may use during the period of three months beginning July 1, 1943, and during each succeeding period of three months until otherwise ordered, pursuant to paragraphs (b) (4) and (b) (5) of this order, a manufacturer may use during such periods instead of the amount of platinum contained in jewelry produced by him during 1941:

(i) An amount of karat gold equal to 16⅔% of such platinum, or

(ii) An amount of palladium equal to 6⅞% of such platinum, or

(iii) An amount of karat gold equal to 16⅔% of any portion of such platinum plus an amount of palladium equal to 6⅞% of the remaining portion of such platinum.

(7) The restrictions contained in paragraphs (b) (1) through (b) (6) inclusive of this order shall not apply to any manufacturer who, during the period beginning April 15, 1943, and ending June 30, 1943, inclusive and during each succeeding period of three months until otherwise ordered, produces jewelry containing a total aggregate weight of karat gold and palladium less than 250 ounces: *Provided*, That

(i) Such manufacturer produced jewelry during 1941, and

(ii) Such manufacturer does not produce jewelry containing a greater total aggregate weight of karat gold and palladium than the amount contained in the jewelry produced by him during 1941, plus

(a) An amount of karat gold equal to 33⅓% of the platinum contained in jewelry produced by him during 1941, or

(b) An amount of palladium equal to 14% of the platinum contained in jewelry produced by him during 1941, or

(c) An amount of karat gold equal to 33⅓% of any portion of the platinum contained in jewelry produced by him during 1941, plus an amount of palladium equal to 14% of the remaining portion of such platinum.

(8) The restrictions contained in this order shall not apply to the use of karat gold and palladium in the repair of articles of jewelry, provided that no more karat gold and palladium by weight is used for such repairs than 5% of the total weight of karat gold and palladium contained in the article being repaired. In such cases where the repair of articles of jewelry involve the use of more karat gold and palladium than the 5% specified above, such repair operations shall be deemed to be production of jewelry operations and the total weight of karat gold or palladium used in such operations shall be included as part of the karat gold or palladium such manufacturer is permitted to use in the production of jewelry specified in paragraph (b) of this order.

(c) *Applicability of other orders.* In so far as any other order heretofore or hereafter issued by the Office of Production Management or War Production Board, including Copper Conservation Orders M-9-c and M-9-c-2, as amended from time to time, limits the use of any material in the production of jewelry to a greater extent than the limits imposed by this order, the restrictions in such other order shall govern unless otherwise specified therein.

(d) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time.

(e) *Avoidance of excessive inventories.* No manufacturer of jewelry shall accumulate, for use in the manufacture of jewelry, inventories of raw materials, semi-processed materials or finished parts in quantities in excess of the minimum amount necessary to maintain production at the rates permitted by this order.

(f) *Reports.* (1) Each manufacturer shall file with the War Production Board on or before April 30, 1943, a report on Form PD-797, showing the amount of karat gold, the amount of palladium, and the amount of platinum by weight contained in the jewelry produced by him during the year 1941, together with a statement as to whether such report is based on written records or on estimates.

(2) Each manufacturer shall file with the War Production Board on or before April 30, 1943, and on or before the 15th day of each third calendar month thereafter, a report on Form PD-797, showing the amount of karat gold and the amount of palladium, by weight, contained in the jewelry produced by him during the preceding calendar quarter, and amount of copper by weight used by him during such quarter in alloying gold for use in jewelry.

(g) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining any further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(h) *Appeals.* Any appeal from the provisions of this order must be made on Form PD-500.

(i) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Consumers Durable Goods Division, Washington, D. C., Ref: L-45.

Issued this 15th day of April 1943.

[Limitation Order L-239 as amended April 15, 1943]

The fulfillment of requirements for the defense of the United States has created shortages in the supply of materials entering into the production of folding and set-up boxes for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3162.1 *Limitation Order L-239*—(a) *Definitions.* (1) "Folding box" means any collapsible container, or part thereof, made of paper or paperboard, excepting solid fibre or corrugated shipping containers not made on folding box machinery.

Chapter XI—Office of Price Administration

PART 1315—RUBBER AND PRODUCTS AND MATERIALS OF WHICH RUBBER IS A COMPONENT

[MPR 200,[1] Amendment 6]

RUBBER HEELS, RUBBER HEELS ATTACHED AND ATTACHING OF RUBBER HEELS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation 200 is amended in the following respects:

1. Section 1315.1420 (g) (1) is amended by adding the following brand of heel and manufacturer's name in the table in such a manner that the brand of heel will appear alphabetically: "Borman Pneumatic Heel" and "Borman Pneumatic Heel Company".

2. Section 1315.1420 (g) (6) is amended to read as follows:

(6) Grades "V-1", "V-2", "V-3" and "V-4" mean heels made in whole or in part of rubber manufactured after August 31, 1942 which can meet the following physical tests:

(i) "Non-fiber heels" are either heels which do not contain any fiber or heels which contain fiber only in one or more plugs, which are placed in the area of greatest wear. Non-fiber heels shall be classified in accordance with the minimum physical specifications they are able to meet. These specifications and the corresponding classifications of the heel follow:

Grade	Minimum abrasive index[1]		Tensile strength
	All types except whole heels	Whole heels	
V-1	23	20	1,000
V-2	18	16	800
V-3	13	12	500
V-4	8	8	400

[1] No minus tolerance is permitted. The methods of federal specifications EA-ZZ-H-141 and ZZ-R-601a shall be applicable to the specifications.

(ii) "Segment fiber heels" are heels which have a non-fiber base stock and a segment containing fibers placed at the back of the heel in the area of greatest wear. If such heels are produced before May 20, 1943, they shall be classified in accordance with the minimum physical specifications the non-fiber portion of the heel can meet. These specifications are set forth in subdivision (i) of this subparagraph. If such heels are produced on or after May 20, 1943, they shall be classified in the manner set forth in subdivision (iii) of this subparagraph.

(iii) "Fiber heels" are segment fiber heels produced on or after May 20, 1943, and any heels containing fiber in any portion of the heel except in one or more plugs which may be placed in the area of greatest wear. If the manufacturer wishes, he may classify such heels in accordance with the minimum specifications set forth in subdivision (i) of this subparagraph (6). If such a method of classification is used, each compound used in the manufacture of the heel must meet those requirements. If the manufacturer does not classify such heels in accordance with those specifications, such heels shall be classified as V-4 unless all three of the following requirements are met: They must meet the minimum abrasive index set forth in subdivision (i) of this subparagraph (6) for the classification in which the manufacturer wishes to place the fiber heel; they must meet the following wear tests; and the following report and samples must be submitted:

(a) In order to receive a higher classification than V-4, such heels must be able to wear as well as a non-fiber heel in the classification in which the manu-

facturer wishes to place the fiber heel. The following wear test shall be determinative of this fact: At least ten of the fiber heels in question and the same number of non-fiber heels, which are in the classification in which the manufacturer wishes to place the fiber heel, shall be used in the test. All non-fiber heels used in the test shall be of the same brand and shall be of the same thickness as the fiber heels being tested. The fiber heels being tested shall be attached to shoes in such a manner that one-half of the fiber heels are on left shoes and the other half are on right shoes and that each pair of shoes has a fiber and a non-fiber heel. Each pair of shoes with these heels attached shall then be worn on ordinary city streets or their equivalent until only one-half of the original thickness of either the fiber or non-fiber heel remains at the point of the heel which receives the greatest wear. If the average overall wear of the fiber heels tested in this manner is equal to or less than the average overall wear of the non-fiber heels tested in this manner, the manufacturer may place the fiber heel so tested in the same classification as the non-fiber heel used in the test, *Provided*, That the Office of Price Administration does not designate a different classification therefor in accordance with the provisions of the next subdivision (*b*).

(*b*) After the manufacturer has submitted the fiber heel he wishes to place in a higher classification than V–4 to the test just set forth in the preceding subdivision (*a*) he shall submit samples and a report with respect thereto to the Office of Price Administration in Washington, D. C. The samples shall include eight pairs of the fiber heel in question, eight pairs of the non-fiber heel to which the manufacturer claims the fiber heel is equal in wearing quality and the actual heels tested with the left and right heel designated for each test. The report shall include the desired classification for the fiber heel; the conditions under which each pair of heels was tested; a detailed statement regarding the factory and laboratory controls used by the manufacturer to insure a stable quality of fiber heel, including controls on such factors as hardness, abrasive index, percentage of fiber by volume and specific gravity; data concerning the composition of the heel, including the abrasive index, percent of rubber hydrocarbons by volume and percent of fiber by volume; continuity of the supply of fabric scrap rubber used; and any other data he may wish to submit regarding the quality of the heel. Within twenty-one days of the receipt of this report and samples, the Office of Price Administration will either approve the proposed classification of the heel or designate a different classification therefor to reflect its wearing quality. The Office of Price Administration may compare the wearing quality of the heel not only with the brand of non-fiber heel used by the manufacturer in the test but also with other brands of non-fiber heels. The classification so approved or so designated shall be the classification for the heel. The manufacturer may not sell, offer to sell, deliver or transfer any fiber heels at a classification other than V–4 until the Office of Price Administration has approved the proposed classification, designated a classification or until twenty-one days have elapsed after the receipt by the Office of Price Administration of the report and samples required by this inferior subdivision. If twenty-one days have elapsed after the receipt of the report and samples without the Office of Price Administration disapproving the proposed classification or designating a different classification, the classification for such fiber heel shall be the classification proposed by the manufacturer. However, at any time after such twenty-one days have elapsed, the Office of Price Administration may designate a different classification (not to apply retroactively) for the fiber heel in question in order to classify it properly in accordance with its wearing quality.

This amendment shall become effective April 20, 1943.

NOTE: All reporting and record keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

PART 1388—DEFENSE-RENTAL AREAS

[Maximum Rent Regulation 64, Amendment 1]

HOUSING ACCOMMODATIONS OTHER THAN HOTELS AND ROOMING HOUSES

BEAUFORT DEFENSE-RENTAL AREA

Maximum Rent Regulation No. 64 is amended in the following respects:

1. The title is amended to read as follows:

MAXIMUM RENT REGULATION 64—HOUSING ACCOMMODATIONS OTHER THAN HOTELS AND ROOMING HOUSES

2. The preamble is amended to read as follows:

In the judgment of the Administrator, rents for housing accommodations within each of the defense-rental areas set out in § 1388.981 (a) of this maximum rent regulation, as designated in the Designation and Rent Declaration issued by the Administrator on April 28, 1942, as amended, have not been reduced and stabilized by State or local regulation, or otherwise, in accordance with the recommendations set forth in the said designation and rent declaration.

It is the judgment of the Administrator that by April 1, 1941, defense activities had not yet resulted in increases in rents for housing accommodations within each such defense-rental area inconsistent with the purposes of the Emergency Price Control Act of 1942. The Administrator has therefore ascertained and given due consideration to the rents prevailing for housing accommodations within each such defense-rental area on or about March 1, 1942. The Administrator has made adjustments for such relevant factors as he has determined and deemed to be of general applicability in respect of such housing accommodations, including increases or decreases in property taxes and other costs.

In the judgment of the Administrator, the maximum rents established by this maximum-rent regulation for housing accommodations within each such defense-rental area will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942.

Therefore, under the authority vested in the Administrator by the Act, this maximum rent regulation is hereby issued.

3. Section 1388.981 (a) is amended to read as follows:

(a) This maximum rent regulation applies to all housing accommodations within each of the following defense-rental areas (each of which is referred to hereinafter in this maximum rent regulation as the "Defense-rental area"), as designated in the designation and rent declaration[1] (§§ 1388.1201 to 1388.1205, inclusive) issued by the Administrator on April 28, 1942, as amended, except as provided in paragraph (b) of this section:

(1) The Lake Charles Defense-Rental Area, consisting of the Parish of Calcasieu, in the State of Louisiana.

(2) The Beaufort Defense-Rental Area, consisting of the Counties of Beaufort and Colleton, in the State of South Carolina.

This amendment shall become effective April 15, 1943.

PART 1388—DEFENSE-RENTAL AREAS

[Maximum Rent Regulation 65A, Amendment 1]

HOTELS AND ROOMING HOUSES

BEAUFORT DEFENSE-RENTAL AREA

Maximum Rent Regulation No. 65A is amended in the following respects:

1. The title is amended to read as follows:

MAXIMUM RENT REGULATION 65A—HOTELS AND ROOMING HOUSES

2. The preamble is amended to read as follows:

In the judgment of the Administrator, rents for housing accommodations within each of the defense-rental areas set out in § 1388.1031 (a) of this maximum rent regulation, as designated in the designation and rent declaration issued by the Administrator on April 28, 1942, as amended, have not been reduced and stabilized by State or local regulation, or otherwise, in accordance with the recommendations set forth in the said designation and rent declaration.

It is the judgment of the Administrator that by April 1, 1941, defense activities had not yet resulted in increases in rents for housing accommodations within each such defense-rental area inconsistent with the purposes of the Emergency Price Control Act of 1942. The Administrator has therefore ascertained and given due consideration to the rents prevailing for housing accommodations within each such defense-rental area on or about March 1, 1942. The Administrator has made adjustments for such relevant factors as he has determined and deemed to be of general applicability in respect of such housing accommodations, including increases or decreases in property taxes and other costs.

In the judgment of the Administrator, the maximum rents established by this maximum rent regulation for rooms in hotels and rooming houses within each such defense-rental area will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942.

Therefore, under the authority vested in the Administrator by the Act, this maximum rent regulation is hereby issued.

3. Section 1388.1031 (a) is amended to read as follows:

(a) This maximum rent regulation applies to all rooms in hotels and rooming houses within each of the following defense-rental areas (each of which is referred to hereinafter in this maximum rent regulation as the "Defense-rental area"), as designated in the designation and rent declaration[1] (§§ 1388.1201 to 1388.1205, inclusive) issued by the Administrator on April 28, 1942, as amended, except as provided in paragraph (b) of this section:

(1) The Lake Charles Defense-Rental Area, consisting of the Parish of Calcasieu, in the State of Louisiana.

(2) The Beaufort Defense-Rental Area, consisting of the Counties of Beaufort and Colleton, in the State of South Carolina.

This amendment shall become effective April 15, 1943.

(Pub. Law 421, 77th Cong.)

NOTE: All reporting and record-keeping requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 14th day of April 1943.

Administrator.

PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[RO 13,[2] Amendment 14]

PROCESSED FOODS

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.[*]

Ration Order 13 is amended in the following respects:

1. Section 3.2 (b) is amended to read as follows:

(b) *Reports.* Every processor must file a monthly report, also on OPA Form R-1305, covering the operation of his processor establishment during the month before. The report must be signed by him or by his authorized agent. If he has more than one processor establishment, he must file a separate report for each, except that he may combine in a single report all his processor establishments in a single state. The first report which must be filed is for February 1943, and is part of his registration. Reports for subsequent months must be filed within ten days after the end of the month.

2. Section 3.9 is added, to read as follows:

SEC. 3.9 *Processors must account for differences between their transfers and the number of points given up to the Office of Price Administration.* (a) Every processor must attach to his monthly report on OPA Form R-1305, beginning with the report for March 1943, a statement accounting for all differences between the point value of the processed foods sold or transferred by him during that month, and the number of points given up by him to the Office of Price Administration. Also, if he used any processed foods in grading the processed foods which he produced or imported, he must attach a statement showing how much he used. The statements must be signed by the same person who signed the monthly report.

3. Section 4.6 (b) is amended to read as follows:

(b) *Amount of maximum allowable inventory.* To get a wholesaler's maximum allowable inventory for any month, beginning with April 1943, the point value of all processed foods transferred from his wholesale establishments during the month before, is multiplied by a factor which the Office of Price Administration will fix for each month. The result is his maximum allowable inventory for the month in question. Exchanges of processed foods, and transfers from one to another of his wholesale establishments, must not be included in this computation. The factor for any month, beginning with April 1943, will be fixed by the Office of Price Administration in a supplement to this order.

4. Section 4.6 (c) (1) (ii) is amended to read as follows:

(ii) The number of points he has available for acquiring processed foods, since he can use those points to get additional stocks. These points include all he has on hand, all in his ration bank account (except those for which ration checks are outstanding), and all which he has already given up for processed foods not yet shipped to him. However, points he has received for processed foods which he has not yet shipped are not included.

5. Section 5.7 is amended to read as follows:

SEC. 5.7 *Certain retailers need not report inventory and other information.* (a) A retailer whose gross sales of all commodities during March 1943 were $200 or less must register on OPA Form R-1302, but need not report his inventory, sales or transfers, and points on hand. However, if he elects not to report this information, he will have to operate on the basis of turnover of the stocks he has, and he will not be eligible, when he registers, to receive a certificate enabling him to increase his working stocks.

6. Section 5.8 (c) (1) (ii) is amended to read as follows:

(ii) The number of points which he has available for acquiring processed foods, since he can use those points to get additional stocks. These points include all which he has on hand, all in his ration bank account, if any (except those for which ration checks are outstanding), and all which he has already given up for processed foods not yet shipped to him. However, points he has received for processed foods which he has not yet shipped, are not included.

7. Section 9.9 is added, to read as follows:

SEC. 9.9 *Points must be given up for imports of foods.* (a) Any person (other than persons importing processed foods in accordance with section 10.10) who imports processed foods must give up points to the Collector of Customs (or his deputy) at or before the time the foods are released or delivered to him by the Collector.

(b) The Collector of Customs shall turn over each month, to the district (or, where there is none, the State) office for the area in which the point of entry is located, all points received by him in this way during the preceding month.

8. Section 10.10 is amended, to read as follows:

SEC. 10.10 *Processed foods may be delivered point-free to certain persons—*(a) *Point-free delivery to processors.* No points need be given up for a transfer of processed foods by an authorized customs official to a processor if the processor gives his signed statement to the official showing:

(1) His name;

(2) His principal business address;

(3) His processor registration number;

(4) The address of the establishment at which the foods are to be kept for sale or transfer or for his own use in making other processed foods; and

(5) The amount and kind of processed foods imported at the time.

(b) After the close of each month the Collector of Customs shall deliver all processors' statements received during that month to the Office of Price Administration, care of the Bureau of the Census, Washington, D. C.

(c) *Point-free delivery to representatives of foreign governments, prisoners of war, internees and others.* No points need be given up for a transfer of processed foods by an authorized customs official:

(1) Upon request by the Department of State, to representatives of foreign governments who are within the classes of persons specified in Article 432 (a) or

ONION SETS

In the judgment of the Price Administrator, it is necessary and proper to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, that maximum prices be established for the sale of onion sets. The following regulation supersedes Temporary Maximum Price Regulation No. 26 and establishes maximum prices in a manner calculated to promote equitable distribution of this important food production commodity through normal channels of trade.

The maximum prices established by this regulation are, in the judgment of the Price Administrator, generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act, as amended, and Executive Order 9250. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and filed with the Division of the Federal Register.*

SEC. 5. *Definitions.* (a) When used in this Maximum Price Regulation No. 371, the term

(1) "Person" means an individual, corporation, partnership, association or other organized group of persons or the successor or representative of any of the foregoing, and includes the United States or any government or any political subdivision or agency of either thereof.

(2) "Each seller" includes each grower, dealer, wholesaler, wholesale outlet, retailer, retail outlet and every other person selling onion sets of the 1942 crop.

(3) "Dealer" means a person who cleans, sizes or bags onion sets for resale by him.

(4) "Wholesaler" means a person who buys such onion sets and resells to any person other than ultimate users.

(5) "Wholesale outlet" means a department, branch or unit of one concern or a unit of an affiliated group of concerns or organizations which department, branch or unit performs a function equivalent to that of a wholesaler in the selling or distribution of such onion sets and which concern, concerns or organizations also deal in such onion sets at the grower or dealer levels of distribution.

(6) "Retailer" means a person who buys such onion sets and resells to ultimate users.

(7) "Retail outlet" means a department, branch or unit of one concern or a unit of an affiliated group of concerns or organizations which department, branch or unit performs a function equivalent to that of a retailer in the selling or distribution of such onion sets and which concern, concerns or organizations also deal in such onion sets at other levels of distribution.

(8) "Commercial user" means a person who buys such onion sets to plant for a crop of onions which he intends to sell.

(10) "Billing charge" means a charge or entry as a part of the bookkeeping system of debits and credits made between different departments, branches or units of an affiliated group of concerns or organizations for services rendered or commodities delivered by one to another.

(12) "Onion sets" mean small onion bulbs produced and sold for planting to yield a crop of onions.

SEC. 6. *Maximum prices for the sale or delivery of onion sets.* (a) Each seller's maximum price and billing charge for all sales or deliveries of onion sets shall be his highest price or billing charge charged on and for each class of sales or deliveries of each type, variety or size of onion sets during the period between February 10 and 15, 1943.

However, in determining "his highest price or billing charge" the seller shall not commingle f. o. b. selling prices and billing charges with delivered selling prices and billing charges. If for a given class of sales or deliveries during said five day period he had both, then his highest price or billing charge f. o. b. his established place of business shall be his maximum price and billing charge f. o. b. his established place of business hereunder; and his highest price or billing charge delivered to a given point (or area including all territory within which he had a uniform delivered price or billing charge during said base period) shall be his maximum price and billing charge delivered to that point or area hereunder. If under the foregoing provision a seller has no maximum delivered price or billing charge for any particular point or area he may determine the same by adding to his maximum price or billing charge f. o. b. his established place of business (determined as herein provided) the actual delivery cost as to each subsequent transaction; or he may take all or a representative list of prospective deliveries in a designated area and average his actual cost of such deliveries in said area and that figure added to his maximum f. o. b. price and billing charge shall be his uniform maximum delivered price and billing charge for that area. If under the foregoing provisions a seller had no maximum price or billing charge f. o. b. his established place of business, he may determine the same by taking his maximum price and billing charge delivered to a given point or area and deducting therefrom the actual delivery costs from his established place of business to or within that point or area and the figure obtained shall be his maximum price and billing charge f. o. b. his established place of business.

(b) If under the foregoing provision, a seller has no maximum price or billing charge for a given class of sales or deliveries, his maximum price and billing charge for such class of sales and deliveries shall be the maximum price and billing charge of his closest competitor for such class of sale and deliveries.

(c) If under the foregoing provisions a seller has a maximum price and billing charge for a given class of sales and deliveries for one or more, but not for all types, varieties, or sizes of onion sets, he shall determine his maximum price and billing charge for those types, varieties or sizes for which he has no such price or billing charge, by taking his maximum price and billing charge for that class of sales and deliveries for the most similar type, variety or size and add thereto or subtract therefrom the discount or premium, as the case may be, normal to his own business or, if none, normal to the trade for the type, variety or size in question in relation to said most similar type, variety or size on which he has a maximum price and billing charge; and the resultant figure shall be his maximum price and billing charge for the type, variety or size in question.

(d) If any retailer cannot determine a maximum price under the foregoing provisions, he may establish his maximum price by taking the price in any catalogue of any reputable mail order house for sales to ultimate users of the type, variety or size of onion sets in question prevailing during the period between February 10 and 15, 1943. Said maximum price shall be f. o. b. his established place of business or delivered, dependent upon which basis the price is quoted in said catalogue.

(e) To cover shrinkage, for every two weeks after the effective date of this regulation each seller or prospective seller may add 5 cents per bushel to his maximum price as hereinbefore established.

SEC. 7. *Records and reports.* Every person selling onion sets shall preserve for examination by the Office of Price Administration all his existing records relating to prices which he charged for sales or deliveries of onion sets during the period between February 10 and 15, 1943, and prepare and maintain for examination by any person during ordinary business hours a statement showing his then existing maximum prices for onion sets.

SEC. 8. *Evasion.* The provisions of this Maximum Price Regulation No. 371 shall not be evaded whether by direct or indirect methods in connection with any offer, solicitation, agreement, sale, delivery, purchase, or receipt of any commodity covered by this regulation alone or in conjunction with any other commodity or by way of commission, service, transportation or other privilege or by tying-agreement or other trade understanding or otherwise.

SEC. 9. *Protests and petitions for amendment.* Any person seeking a protest or an amendment of any provisions of this regulation may file a protest or petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1 [1] issued by the Office of Price Administration.

SEC. 10. *Enforcement.* Any persons violating any provisions of this Maximum Price Regulation No. 371 shall be subject to the criminal penalties, civil enforcement actions, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

This regulation shall become effective April 15, 1943.

Issued this 14th day of April 1943.

In order to reflect new policies pronounced by the Director of Economic Stabilization, the Administrator of Food Production and Distribution and the Price Administrator, Maximum Price Regulation No. 346 requires complete revision of all prices in every area. The revised maximum price regulation establishes fair and equitable prices for corn, consistent with the subsidies which are to be given in specific areas for transportation.

The maximum prices established by this regulation will reflect to producers of corn the highest of the prices required by the provisions of the Emergency Price Control Act of 1942, as amended, and by Executive Order 9250, and has been approved and directed by the Director of Economic Stabilization pursuant to section 5 of the Executive Order of April 8, 1943 (8 F.R. 4680). A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register*

In fixing the maximum prices established by this regulation, the Price Administrator has given adequate weighting to farm labor. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

(c) *Geographic applicability.* The provisions of this revised regulation apply to the forty-eight states of the United States and to the District of Columbia.

(d) *Export sales.* The maximum prices at which a person may export corn shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation[2] issued by the Office of Price Administration.

SEC. 2. *Prohibition against dealing in corn at prices above the maximum prices.* (a) On and after March 12, 1943 regardless of any contract or obligation, no person shall in the course of trade or business sell, deliver, buy or receive corn at prices above the maximum prices established by this revised regulation, nor shall any person agree, offer, solicit or attempt to do any of the foregoing: *Provided, however,* That any contract made and entered into on and between January 13, 1943, and March 11, 1943, both dates inclusive, which complies with Temporary Maximum Price Regulation No. 25, or on and between March 12, 1943, and April 13, 1943, both dates inclusive which complies with the original Maximum Price Regulation No. 346, issued March 12, 1943, may be performed in accordance with the terms and provisions thereof, notwithstanding any provision of this Revised Maximum Price Regulation No. 346. However, prices lower than the maximum prices established by this revised regulation may be charged and paid.

(b) In ascertaining maximum prices pursuant to the provisions of this revised regulation, each maximum price per bushel for sales in carload quantities which results in any fraction other than one eighth of a cent of a multiple thereof, shall be adjusted to the next higher eighth of a cent; and each maximum price per bushel for sales in less than carload quantities which results in a fraction of more or less than half a cent shall be adjusted to the next higher half cent.

SEC. 3. *Maximum prices for sales of No. 2 yellow corn in carload quantities at terminal price basing points.* The term "terminal price basing point" means any point within the cities listed below or within the switching limits thereof.

The maximum prices per bushel for sales of No. 2 yellow corn in carload quantities at the terminal price basing points shall be:

Chicago	$1 07
Milwaukee	1 07
Duluth and Superior	1 06¼
Minneapolis and St. Paul	1 03
Peoria and Pekin	1 06
St. Louis and East St. Louis	1 07¾
Kansas City, Kansas	1 04
St. Joseph, Missouri	1 04
Omaha and Council Bluffs	1 00
Sioux City	99
Nashville, Tennessee	1 20¼

SEC. 4. *Maximum prices for sales of yellow corn (in carload quantities) either on track or loaded on a vessel at interior points in Area A.* The maximum price for sales of yellow corn in carload quantities on track or loaded on a vessel at an interior point in Area A shall be the maximum price for sales of No. 2 yellow corn in carload quantities at the appropriate terminal price basing point (defined immediately below), less one cent per bushel for marketing charges and less the lowest published rail or water freight rate from the said interior point to the said terminal price basing point.

As used herein, the term "appropriate terminal price basing point" is the terminal price basing point named in section 3 whose use in the above calculation results in the highest maximum price at the said interior point.

The "maximum price for sales on track" means the maximum price for the corn loaded in a railway car, or if for water shipment, it shall be a maximum price for the corn loaded on a barge or vessel.

An interior point in Area A is any point within this area from which corn is shipped in carload quantities to a terminal price basing point, or from which corn is sold on the basis of a terminal price basing point, as defined in section 3. Area A represents the corn producing area described in Appendix A of this regulation.

Illustration of how a maximum price is determined for sales of yellow corn on track or loaded on a vessel at an interior point in Area A.

A is an interior point in Illinois. The maximum price per bushel at the terminal price basing point Chicago is $1.07. The freight from A to Chicago is 7 cents per bushel. Deducting 7 cents freight and 1 cent marketing charges from the Chicago price, the maximum price at A becomes $0.99 per bushel. However, the maximum price per bushel at St. Louis, another terminal price basing point, is $1.07¾ and freight from A to this terminal price basing point is also 7 cents per bushel. Deducting 7 cents and 1 cent from $1.07¾, the maximum price at A becomes $0.99¾ per bushel. St. Louis therefore is the appropriate terminal price basing point and the maximum price on track or loaded on a vessel at interior point A is $0.99¾ per bushel.

SEC. 5. *Maximum prices in Area A for sales by producers of yellow corn not on track or loaded on a vessel at an interior point in Area A*—(a) *Sales by producers to farmers.* The maximum price for sales in Area A by a producer thereof of yellow corn not on track or loaded on a vessel at an interior point to another farmer shall be the maximum price for sales of yellow corn on track or loaded on a vessel at the interior point nearest to the point of production, as calculated under section 4 hereof.

(b) *Sales by producers to any person other than a farmer.* The maximum price for sales in Area A by a producer thereof of yellow corn not on track or loaded on a vessel at an interior point to any person other than to a farmer shall be the maximum price for sales of yellow corn on track or loaded on a vessel at the interior point nearest to the point of production, less at least 2 cents per bushel.

Illustration of how a producer determines his maximum prices for sales of yellow corn under section 5:

The maximum price on track or loaded on a vessel at the interior point nearest to the producer's farm is assumed to be $1.07 per bushel (Chicago basis) less 1 cent marketing charges less 7 cents freight or $0.99 per bushel.

If this producer sells the yellow corn to a trucker or to any other producer other than to a farmer, the maximum price becomes $0.99, the track price determined above, less 2 cents, or a maximum price of $0.97 per bushel.

SEC. 6. *Maximum prices for sales to local users of yellow corn stored at interior points, and sales of yellow corn by truckers, in Area A*—(a) *Sales of corn stored at interior points.* (1) When yellow corn purchased from a producer is stored at an interior point and is thereafter sold to a farmer or other local user, the maximum price shall be the maximum price on track at the interior point, plus 5 cents per bushel.

(2) If the corn is sold to a trucker, the maximum price shall be the maximum price on track at the interior point.

Example: A local elevator purchases corn from a farmer at an assumed maximum price of $1.01. The track price is 2 cents higher, or $1.03. The corn is thereafter sold to a farmer or a feed mixer. The maximum price for this sale is 5 cents above the track price, or $1.08. If the corn is sold to a trucker, the maximum price is the track price, or $1.03.

(b) *Sales by truckers.* When yellow corn is moved by truck within Area A as described in Appendix A, or from a point within Area A to any point outside of such area, but not to or through a terminal price basing point, the maximum price for the sale of the corn shall be the purchase price paid by the trucker, plus actual transportation costs incurred in the shipment, at rates not higher than the lowest applicable common carrier rates, plus 2 cents per bushel. The trucker shall furnish to the purchaser a statement showing the place and date of purchase, the name of the person from whom the corn was purchased, the price paid, and the amount of transportation charges.

Example: A producer sells corn to a trucker, at a maximum price assumed to be $0.97 per bushel. The trucker sells the corn to a farmer after a haul for which applicable common carrier rates amount to 5 cents per bushel. The maximum price for resale is $0.97, plus 5 cents, plus 2 cents, or $1.04 per bushel.

SEC. 7. *Maximum prices for sales of No. 2 yellow corn at interior points in Area A, when shipped from another interior point or from a terminal price basing point*—(a) *Track price.* When No. 2 yellow corn is shipped in carload quantities to an interior point, from another interior point or from a terminal price basing point, the maximum price on track, delivered at the interior point, shall be the maximum price at the point from which the shipment is made, plus freight charges from that point.

(b) *Resale at interior point.* Upon a resale of such corn by a retail dealer at the interior point of delivery, the seller may charge the maximum price specified in paragraph (a) of this section, plus 5 cents per bushel.

Example: A seller in Omaha sells a carload of corn to a local elevator at an interior point in Nebraska. The freight to the interior point, from Omaha, is assumed to be 4 cents per bushel. The highest price at which the sale may be made, for delivery at the interior point, is the Omaha price of $1.00 plus 4 cents, or $1.04. When the elevator resells the corn to a farmer or to a feed mixer, the highest price that may be charged is $1.04 plus 5 cents, or $1.09 per bushel.

SEC. 8. *Maximum prices for sales by producers and truckers of yellow corn in Area B, and in Areas VI and VII*—(a) *Sales by producers in Area B.* Producers shall determine maximum prices for sales of yellow corn in Area B by calculating a track price in the same manner as described in Section 4 hereof for the determination of maximum prices for sales on track in Area, except that for the purpose of this paragraph (a), the terminal price basing points and the corresponding maximum prices to be used in this calculation shall be as follows:

(1) Louisville $1.11¼, (2) Cincinnati $1.11¼, (3) Nashville $1.20¼, (4) Chicago $1.07, (5) A price of $1.21½ less freight from shipping point to Philadelphia.

The maximum price for sales in Area B by producers of yellow corn to a farmer shall be the track price, as determined above, at the shipping point nearest to the point of sale, plus not more than 5 cents per bushel.

The maximum price for sales in Area B by producers of yellow corn to a person other than a farmer shall be the track price, as determined above, at shipping point nearest to the point of sale less at least 2 cents per bushel.

(b) *Sales by producers in Area VI.* The maximum price for sales in Area VI by producers of yellow corn to a farmer shall be $0.93 per bushel and to any other person $0.91 per bushel.

(c) *Sales by producers in Area VII.* The maximum price for sales in Area VII by producers of yellow corn to a farmer shall be $0.94 per bushel and to any other person $0.92 per bushel.

(d) *Sales by truckers in Area B and Areas VI and VII.* The maximum price for sales of corn in Area B and Areas VI and VII shall be the purchase price paid by the trucker, plus actual transportation costs incurred in the shipment, at rates not higher than the lowest applicable common carrier rates, plus 2 cents per bushel. The trucker shall furnish to the purchaser a statement showing the place and date of purchase and name of the person from whom the corn was purchased, the price paid, and the amount of transportation charges.

SEC. 9. *Maximum prices for sales by producers and truckers of yellow corn in Areas I through V and VIII through XI*—(a) *Sales by producers.* The maximum prices for sales by producers of yellow corn in Areas I through V and VIII through XI described in Appendix A hereto, shall be the maximum prices determined under section 10 of this revised regulation for the sales of No. 2 yellow corn in carload quantities delivered on track at the railway station nearest the farm of the producer.

The maximum price at the railway station may be calculated by reference to the freight rates from the respective terminal price basing points, as set forth in section 10 of this regulation.

(b) *Sales by truckers.* In any case in which yellow corn is moved by truck within Areas I through V and VIII through XI the maximum price for the sale by the trucker shall be the maximum price for No. 2 yellow corn, in carload quantities, delivered on track at the railway station nearest the point of delivery. The trucker shall furnish to the purchaser a statement showing the place and date of purchase, and the name of the person from whom the corn was purchased.

However, the maximum price for sale of yellow corn moved from Area A into a point in these aforementioned areas by a trucker is calculated under the provisions of section 6 (b) or section 8 of this regulation.

SEC. 10. *Maximum prices for delivery at destination points in Area B and Areas I through XI*—(a) *Maximum prices in Area B.* The maximum prices per bushel for No. 2 yellow corn, in carload quantities, for delivery when shipped into destination points located within Area B, described in Appendix A, shall be $1.07, the maximum price at

AUTHORITY: §§ 27.1 to 27.7, inclusive are issued under 39 Stat. 535; 16 U.S.C. 3.

§ 27.1 *Disposal of logs, fuel wood, etc.; cutting of green timber.* The disposal of logs, fuel wood, poles, and other forest products in Mount Rainier National Park by timber disposal permits is permitted only where such disposal will be of benefit to the forest stand through reduction of existing fire hazards, such as are caused by dead, down, or blowndown timber, or where in the judgment of the park superintendent the neighboring forest is endangered by tree disease or insect infestation. In no instance will the cutting of green timber be permitted for private use except on road right-of-way clearing projects or in blowndown clearing projects where such timber may be made available.

§ 27.2 *Permits.* (a) All timber disposal permits shall be issued and approved in writing by the park superintendent's office prior to the initiation of any cutting activities. Such permits shall include a map designating the area to be cut. Application for such permits should be made to the park superintendent.

(b) All timber disposal permits may be suspended when weather conditions or other considerations make timber disposal operations undesirable for the best interests of the Government.

(c) Permittees and their employees and agents shall at all times conform to all laws and regulations applicable to Mount Rainier National Park.

§ 27.3 *Timber disposal operations.* (a) All Douglas fir and western white pine logs are considered merchantable which are not less than 20 feet long, at least 12 inches in diameter inside bark at small end, and after deductions for visible indications of defect scale 33⅓ per cent of their gross scale.

(d) All cordwood shall be utilized to a minimum diameter of 6 inches unless rotten.

Any unnecessary damage to forest reproduction, remaining timber, or other ground cover, or the violation of any provision of the regulations in this part will, at the discretion of the park superintendent, result in the cancellation of the permit. In the event of cancellation of the permit, all bonds given to guarantee the fulfillment of the terms of the permit shall be forfeited, and all moneys theretofore paid by the permittee as a part of the purchase price or otherwise may be retained as liquidated damages.

§ 27.4 *Prevention and suppression of forest fires.* (a) Permittee shall independently do all in his power to prevent and suppress forest fires on the timber disposal area and its vicinity, and shall also require his employees and agents to do likewise. (b) During periods of fire danger, as designated by the park superintendent, the permittee shall prohibit smoking and the building of fires by his employees and agents.

(c) Fire fighting tools and equipment as specified by the park superintendent at the time of the issuance of the permit shall be kept in suitable caches by the permittee at points designated by the park superintendent, and shall be used only for the suppression of forest fires within or threatening the timber disposal area.

(b) All debris resulting from cutting dead timber in green stands will be lopped or scattered so as to lie flat on the ground unless such disposal will, in the judgment of the park superintendent, constitute a serious fire hazard, in which case such debris shall be piled and burned.

(c) All debris resulting from timber operations in old burns shall be piled and burned, with care taken to avoid injury to reproduction. In some instances, upon approval of the park superintendent or his representative, the disposal of such debris may be made by lopping and scattering.

Such charge will be considered as the price of the wood and also as liquidated damages.

PART 330—MINIMUM PRICE SCHEDULE, DISTRICT NO. 10

ORDER GRANTING RELIEF

Order granting temporary relief and conditionally providing for final relief in the matter of the petition of District Board No. 10 for changes in shipping points, and originating railroads of certain mines in District No. 10.

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, having been duly filed with this Division by the above-named party, requesting changes in the shipping points and originating railroads of certain mines in District No. 10; and

It appearing that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The following action being deemed necessary in order to effectuate the purposes of the Act;

Now, therefore, it is ordered, That, pending final disposition of the above-entitled matter, temporary relief is granted in the manner hereinafter set forth: Commencing forthwith § 330.2 (*Mine index numbers*) is hereby amended as follows:

Hurd, Illinois, is substituted for Springfield, Illinois as the shipping point for Mine Index No. 97 of the Mine "B" Coal Company. Springfield and Southwestern Railroad is substituted for Chicago, Springfield and St. Louis Railroad as the railroad upon which rail shipments of coals produced at Mine Index No. 97 shall originate.

Springfield and Southwestern Railroad Company is substituted for Chicago, Springfield and St. Louis Railroad as the railroad upon which rail shipments of coals produced at Mine Index No. 28 of Mine "B" Coal Company shall originate.

Atchison, Topeka and Santa Fe Railway is substituted for Peoria and Pekin Union Railroad as the railroad upon which rail shipments of coals produced at Mine Index No. 819 of Pekin Coal Mining Company shall originate. Freight Origin Group No. 120 is substituted for Freight Origin Group No. 125 which was formerly assigned to this mine. A price adjustment of 24 cents per net ton shall be applicable to shipments from Mine Index No. 819 to Peoria and Pekin, Illinois.

Canton, Illinois is substituted for Norris, Illinois as a shipping point for Mine Index No. 658 of Blakely Coal Company (Wm. Blakely) and Railroad Locomotive Fuel Price Exceptions 1-F, 2-A, 6, 7, 8, 43, and 65, § 330.10 (a) (3) (*Special prices—Exceptions*) are made applicable to Mine Index No. 658.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this Order, pursuant to the rules and regulations governing practice and procedure before the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this order, unless it shall otherwise be ordered.

No order is issued concerning the requested changes in Freight Origin Groups Numbers for Mine Index Nos. 28 and 97 of Mine "B" Coal Company for the reason that a change in the name of the railroad upon which shipments of coals produced at these mines originate does not place these mines in Freight Origin Groups different from that in which they have heretofore been placed.

Dated: April 13, 1943.

(2) "Osmium alloy" means any alloy containing 0.5 percent or more of osmium metal by weight.

(3) "Process" means to fabricate, assemble, alloy, mix, melt, cast, extrude, roll, turn, spin, or otherwise shape, but does not include the smelting or refining of osmium ore or scrap for the production of sponge metal.

(4) "Put into process" means the first change by a consumer in the form, shape, or size of material from that in which it is received by him.

(5) "Supplier" means any person who sells or offers for sale, or who delivers, osmium or osmium alloys to consumers.

(6) "Consumer" means any person who uses osmium or any osmium alloy by incorporating it physically or chemically in the products or parts thereof which he manufactures, or who uses or consumes osmium or any osmium alloy in any manufacturing, laboratory, testing, plating, or repairing process.

(7) "Implements of war" means combat end products, complete for tactical operations (including, but not limited to, aircraft, ammunition, armament, weapons, ships, tanks, and military vehicles), and any parts, assemblies, and materials to be incorporated in any of the foregoing items which are produced for the Army or the Navy of the United States, the Maritime Commission, the War Shipping Administration, or for any foreign government pursuant to the act approved March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act), where the use of any osmium or osmium alloys to the extent employed is required by the latest issue of government specifications (including performance specifications unless otherwise directed by the War Production Board) applicable to the contract, subcontract, or purchase order. The term does not include facilities or equipment used to manufacture the foregoing items.

(b) *Restrictions on use of osmium.* On and after April 16, 1943, no person shall put into process or process any osmium, exclusive of an osmium alloy, except for the purpose of manufacturing or alloying an osmium alloy for use in implements of war.

(d) *Restrictions on use of osmium alloys manufactured or alloyed on or after April 16, 1943.* On and after April 16, 1943, no person shall put into process or process any osmium alloy manufactured or alloyed on or after April 16, 1943, except for use in implements of war.

(e) *Prohibitions against sales or deliveries.* No person shall sell or deliver any osmium or osmium-containing material or osmium alloy or products thereof in the form of raw materials, semi-processed materials, finished parts, or sub-assemblies to any person if he knows or has reason to believe such material or product thereof is to be used in violation of the terms of this order.

(f) *Limitation on inventories.* No consumer shall receive delivery of any osmium, osmium-containing material, osmium alloy, or products thereof in the form of raw materials, semi-processed materials, finished parts or sub-assemblies, nor shall he put into process any raw material in quantities which in either case shall result in an inventory of raw, semi-processed, or finished material in excess of a minimum practicable working inventory, taking into consideration the limitations placed upon the use of osmium, osmium-containing material, osmium alloy, or products thereof, by this order.

(g) *Reports.*—(1) *Monthly report.* Each supplier, each consumer, and each person owning in any month stocks of osmium or osmium alloy not incorporated in finished items or parts thereof shall file Form PD-846 with the War Production Board on or before the 15th day of the following month.

(2) *One time report.* Each supplier and each consumer of osmium alloy, and each person owning on April 16, 1943, stocks of osmium alloy not incorporated in finished items or parts thereof shall file Form PD-848 with the War Production Board on or before May 30, 1943.

(h) *Miscellaneous provisions.*—(1) *Appeal.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(2) *Applicability of order.* The prohibitions and restrictions contained in this order shall apply to the use of osmium and osmium alloy in all items manufactured after April 16, 1943, irrespective of whether such items are manufactured pursuant to a contract made prior or subsequent to such date. Insofar as any other order of the War Production Board may have the effect of limiting or curtailing to a greater extent than herein provided, the use of osmium or osmium alloys in the production of any item, the limitations of such other order shall be observed.

(3) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(4) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Miscellaneous Minerals Division, Washington, D. C. Ref.: M-302.

Chapter XI—Office of Price Administration

PART 1381—SOFTWOOD LUMBER

[Rev. MPR 219]

NORTHEASTERN SOFTWOOD LUMBER

Maximum Price Regulation 219 is amended to read as follows:

Preamble: This revision of the Northeastern softwood lumber regulation is designed to provide dollars-and-cents prices for all species of Northeastern softwood lumber, whether domestic or imported, in both standard and special grades or items. In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and filed with the Division of the Federal Register.*

§ 1381.301 *Maximum prices for Northeastern softwood lumber.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250, Revised Maximum Price Regulation No. 219 (Northeastern Softwood Lumber), which is annexed hereto and made a part hereof, is hereby issued.

AUTHORITY: § 1381.301, issued under Pub. Laws 421 and 729, 77th Cong.; E O 9250, 7 F R. 7871

ARTICLE I—PROHIBITION AND SCOPE OF REGULATION

SECTION 1 *Over-ceiling prices prohibited.*—(a) On and after April 21, 1943, regardless of any contract or other obligation, no person shall sell or deliver, and no person shall buy in the course of trade or business, any Northeastern softwood lumber for direct mill shipment at prices higher than the maximum prices fixed by this regulation, and no person shall agree, offer, or attempt to do any of these things.

SEC. 2 *Less than maximum prices.* Prices lower than the maximum prices may, of course, be charged and paid.

SEC. 3 *Lumber in transit.* If lumber has been received before April 21, 1943, by a carrier, other than one owned or controlled by the seller, for shipment to a buyer, that shipment is not subject to this regulation. It remains subject to the terms of any regulation, whether the General Maximum Price Regulation or an earlier version of this regulation, which covered it at the time the lumber was turned over to the carrier.

SEC. 4 *What transactions are covered.*—(a) This regulation covers, under the name of sales for "direct-mill shipment", all sales of Northeastern softwood lumber, no matter who the seller is and regardless of the quantity involved, except sales of Northeastern softwood lumber which was part of the regular stock of a "distribution yard" at the time the sale was made.

(b) The term "distribution yard" means an establishment which meets all of the following tests:

(1) It sells substantially all of the lumber of all species handled through its yard in the same size, and condition of dressing, in which received. However, as to sales of Northeastern softwood lumber, a yard located in the Northeastern area will be considered to meet this test if it receives in rough form and processes by sawing or planing less than 30 percent of its Northeastern softwood lumber. If the yard receives in rough form and processes by sawing or planing 30 percent or more of its Northeastern softwood lumber, it cannot be considered a distribution yard for the purposes of this regulation, although it may be considered a distribution yard for other species and lumber products if it qualifies as such under the terms of the regulations governing the particular product.

(2) It sells 51 percent or more of the lumber handled through the yard in quantities of 18,000 board feet or less.

(3) It maintains permanent stocks of different species of lumber from different regions (such as Northeastern white pine, Eastern hemlock, Southern pine, Douglas fir, Ponderosa pine, etc.), in various lengths, grades, and sizes, and of lumber products (such as millwork, plywood, shingles, etc.).

(4) It maintains a storage yard, offices, yard help, and a sales force, for the handling and sale of its stocks.

(5) It is prepared to make prompt deliveries by truck of lumber and lumber products out of its yard stock, in both small and large quantities.

(6) It does not manufacture lumber from logs.

(7) It is located in a lumber consuming area.

(c) An establishment will be considered a distribution yard only if it met *all* of the above tests *both* during the single calendar month and the period of six calendar months immediately preceding the transaction in question. For example, if the date of the transaction is June 10, the percentage of processing and other tests must be based both upon the month of May and upon the period of December through May.

(d) "CPA yards", as defined in Maximum Price Regulation 215, are considered distribution yards regardless of the above requirements.

SEC. 5 *What products are covered.*—(a) This regulation covers all items of Northeastern softwood lumber whether the item is specifically named in the price tables or not.

(b) This regulation covers, under the name of "Northeastern softwood lumber", the following softwood lumber produced in the States of Maine, New Hampshire, Vermont, Connecticut, Massachusetts, Rhode Island, New York and Pennsylvania, and in that part of the Dominion of Canada located east of the 85th meridian: Northeastern white pine (Pinus strobus), Norway pine (Pinus resinosa), Eastern hemlock (Tsuga canadensis), Eastern spruce (Picea rubra, Picea mariana, and Picea glauca), Eastern white cedar (Thuja occidentalis), and Jack pine (Pinus banksiana).

SEC. 6 *What persons are covered.* Any person who makes the kind of sale or purchase described above, for himself or others, is subject to this regulation. The term "person" includes an individual, corporation, partnership, association, or any other organized group; their legal successors or representatives; the United States, or any government, or any of their political subdivisions, or any agencies of the foregoing

SEC. 7 *Relation to other regulations.*—(a) *General Maximum Price Regulation.*[1] Any sale or delivery covered by Revised

*Copies may be obtained from the Office of Price Administration.

[1] 8 F.R. 3096, 3849, 4347.

Maximum Price Regulation 219 is not subject to the General Maximum Price Regulation.

(b) *Revised Maximum Export Price Regulation.*[2] The maximum price for export sales of Northeastern softwood lumber is governed by the Revised Maximum Export Price Regulation.

ART. II—HOW TO FIGURE MAXIMUM F. O. B. MILL AND DELIVERED PRICES

SEC. 8 *Basic prices.* The maximum f. o. b. mill prices for domestic Northeastern softwood lumber are set forth in Appendices A, B, C, D, and E. The maximum base prices for imported Northeastern softwood lumber are set forth in Appendices A, C, D, and F, and the transportation charges provided in these Appendices shall be added to arrive at the maximum delivered prices to points within the United States.

SEC. 9 *Deductions for cash.* If cash is paid, the maximum price must be reduced by the seller's August, 1941, cash discount. For example, if this discount was 2% and the maximum price without cash discount is $30, the maximum price when cash is paid is $29.40. Exception: on specific written allocations issued by the Office of the Chief of Engineers, War Department, the terms 30 days net may be used by the seller regardless of his established practice.

SEC. 10 *Addition for "direct mill retail sales".* In the case of sales of less than 2,500 feet to any buyer except mills or distribution yards, a handling charge of $5.00 per M board feet may be added to the f. o. b. mill price, together with a percentage mark-up of 10% of the total so obtained, provided the seller expressly agrees:

(a) To see that the lumber is delivered to the job site or buyer's plant at such time and in such quantities as the buyer specifies;

(b) To give the buyer the privilege of exchanging the lumber and returning unused material;

(c) To make good any shortage from stocks kept on hand for this purpose. The size of the sale is determined by the over-all amount involved in the transaction. Thus, if the buyer and seller know that a particular shipment will run to 10,000 feet, the addition may not be made even if the order is broken into five orders of 2,000 feet and delivered on five different days in loads of 2,000 feet.

SEC. 11 *Transportation additions: domestic*—(a) *Private truck.* Where a domestic shipment is exclusively by motor vehicle owned or controlled by the seller, the addition to the f. o. b. mill prices for transportation may be no greater than the actual cost to the seller of delivery by motor vehicle; and in no event shall the charge exceed the rail carload rate for the most nearly comparable haul applied to the quantity actually shipped.

(b) *Common or contract carrier.* For common or contract carrier shipments, the maximum transportation addition shall be either the rate times the estimated weights in the Appendices, or the actual amount paid to the carrier.

(c) *Truck delivery after rail haul.* Where the shipment is by rail followed by truck delivery, the amount added for transportation may include in addition to the amount added for rail transportation, the actual cost of truck delivery.

(d) *Trucking to rails.* Where a truck haul precedes the rail haul, as where a mill located away from a railhead hauls lumber by truck to the railhead, no addition may be made for the truck haul. The seller may apply to the Lumber Branch of the Office of Price Administration for an exception if he can demonstrate that a separate and identifiable charge for the truck haul was customarily made by the seller during the year 1941.

(e) *Transportation to planing mill.* Where the lumber is shipped by rail from a mill having milling-in-transit arrangements with a carrier to a planing mill, owned by the same person, for further processing before delivery to the purchaser, that person may apply for permission to figure transportation charges on the basis of the through rail freight rate from the first mill to final destination in the following case:

(1) Where the hurricane of September, 1938, damaged and destroyed a substantial portion of the timber near which the planing mill had been located so that the mill has been compelled to rely primarily on more distant sources of timber; and

(2) Where it has not been practicable to move the planing mill near other sources of timber because of excessive moving costs, shortages of mill labor and insufficient standing timber in any single location to warrant moving the mill.

The application should be made by letter to the Lumber Branch, of the Office of Price Administration, Washington, D. C., and may be acted upon by letter. The addition may not be made on quotations or sales until permission has been received.

SEC. 12 *Transportation additions: imported lumber.* In the case of sales of imported lumber the transportation charges that may be added to the maximum basic prices are specifically set forth in the various Appendices dealing with imported Northeastern softwood lumber.

SEC. 13 *"Evening-out".* When estimated weights are used, delivered prices shall be evened out to the nearest quarter of a dollar per MBM.

ARTICLE III—SPECIFIC DUTIES AND PROHIBITED PRACTICES

SEC. 14 *What the invoice must contain*—(a) *General.* Because of the large number of possible additions to the basic maximum prices, it is necessary that some of them be separately shown on the invoice. Otherwise the purchaser and the Office of Price Administration could not tell in many cases whether a price which appeared to be above the ceiling was legal or not. Failure to invoice properly is just as much a violation of this regulation as charging an excessive price.

(b) *Basic price.* All invoices must contain a complete description of the lumber to show whether the price is proper or not. Any working, specification, or extra which affects the maximum price must be mentioned in the description. The amount added for these does not have to be separately shown.

(c) *Transportation charges.* In delivered sales, the invoice must contain the:

(1) Point of origin of shipment;

(2) Destination;

(3) Rail rate, (if estimated weights are used; otherwise the actual amount added for transportation); and in the case of the sales of imported lumber, the method of calculation of the freight addition;

(4) The words "direct-mill shipment".

(d) *Delivery and related charges.* Any separate charge which the seller is permitted to make for truck delivery after rail haul, or for trucking to railhead, must be separately shown on the invoice.

(e) *Direct-mill retail sales.* If the price exceeds the basic mill price because of the "direct-mill retail sale" mark-up authorized in section 10, the invoice should show the amount of the mark-up separately labeled "Direct-mill retail sale".

(f) *Average price on different items.* When specific amounts of different grades or classes or sizes of lumber are quoted at an average price, it is permissible to quote at an average price, but only if all of the following conditions are met:

(1) The footage of each item must be shown separately, and a piece tally must be furnished for each shipment.

(2) The average price for the lumber actually shipped must not be higher than it would have been if all the individual grades, classes and sizes shipped had been sold separately at the individual ceiling prices.

(3) If the order is shipped in more than a single carload, truckload, or boat shipment the following invoicing and charging practices must also be followed:

(i) The invoice must show that it is part of a larger order and identify the order. It must also show the individual ceiling prices for the various items of lumber actually contained in each shipment, and the average selling price agreed upon.

(ii) The charges which may be made and collected on account for each shipment must not exceed the average price agreed upon or the total of the ceiling prices for the items in the particular shipment, whichever is the lower. Thus, if an average price was quoted on widths from 4" to 12", and if a car of all 4" was shipped, only the 4" price can be charged and collected on that car. But if a car of all 12" widths was shipped, only the average price quoted could be charged on that car.

(iii) Upon completion of the order, the seller must render a final invoice showing the quantity of each shipment or delivery, the freight charge for each if sold on a delivered basis, the amount received on account, the total amount due on the order at the agreed average prices, and a reconciliation of the total amount so computed with the maximum prices permitted by this regulation. Final payment and all necessary adjustments between buyer and seller are to be made upon the basis of the final reconciliation.

(g) *Different freight rates.* When a single order, for which a single flat delivered price was quoted and accepted, is shipped from two or more mills to a single destination on varying freight rates, the seller may average-out the transportation charges. For example, if a wholesaler bids $33.00 per MBM on a single order of a hundred thousand feet of lumber, the ceiling price being $30.00 per MBM and the estimated freight $3.00, he can ship half of it on a rate resulting in a $2.00 freight charge and half on a rate resulting in a $4.00 freight charge. Where this practice is adopted, the seller must observe all of the following conditions:

(1) Each invoice must state that the particular shipment is part of a larger order and identify the order. It must also show the individual rates for each shipment or delivery.

(2) The transportation charges which may be made and collected for each shipment or delivery, on account, must not exceed the average transportation charge figured on the entire order or the actual transportation charge for the particular shipment based upon the permitted estimated weights, whichever is the lower.

(3) Upon completion of the order the seller must render a final invoice showing the individual f. o. b. mill prices separately, the amount shipped from each mill, the freight charge for each shipment and a reconciliation of the total amount so computed with the agreed delivered selling prices and also with the maximum prices permitted by this regulation. In the event that the sale was made at an average price for different grades, classes or sizes of lumber as well as an averaging-out of transportation charges, the provisions of (f) above shall also be observed. Final payment and all necessary adjustments between buyer and seller are to be made upon the final reconciliation.

SEC. 15 *Records.* All sellers of Northeastern softwood lumber must keep records which show a complete description of items of lumber sold, the name and address of the buyer, the date of the sale and the price. Buyers must keep similar records, including the name and address of the seller. These records must be kept for any month in which the seller or buyer sold or bought 5,000 feet board measure or more of Northeastern softwood lumber. They must be kept for two years for inspection by the Office of Price Administration. Any records which the Office of Price Administration later requires must also be kept.

SEC. 16 *Prohibited practices*—(a) *General.* Any practice which is a device to get the effect of a higher than ceiling price without actually raising the dollars-and-cents price is as much a violation of this Regulation as an outright over-ceiling price.

(b) *Specific practices.* The following are some of the specific practices prohibited.

(1) Getting the effect of a higher price by changing credit practices from what they were in August 1941. This includes decreasing credit periods or making greater charges for extension of credit. In any case, on sales made through the Office of the Chief of Engineers, War Department, terms of 30 days net may be used.

(2) Refusing, without good reason, to ship except in specified or restricted random lengths, or in mixed cars, or under other circumstances which bring the seller an extra return.

(3) Selling as specified lengths or widths a shipment of lumber which is substantially equivalent to standard or random lengths or widths; or reselling as specified lengths or widths a shipment bought by the seller as standard or random lengths or widths.

(4) Grading as a special grade lumber which can be graded as a standard grade; wrongly or falsely grading or invoicing lumber in any way.

(5) Making additions for special specifications, services, or other extras which are not specifically permitted.

(6) Refusing to sell on an f. o. b. mill basis, and insisting on selling on a delivered basis, except in the case of sales of imported Northeastern softwood lumber.

(7) Unnecessarily routing lumber through a distribution yard.

(8) Quoting a gross price above the maximum price, even if accompanied by a discount the effect of which is to bring the net price below the maximum.

(9) Making the buyer take something he does not want in order to get what he does want; for example, making a buyer who orders No. 2 Common take all the upper grades that develop.

(10) Getting a higher price by charging the buyer for ripping or resawing, or charging on the basis of an original size larger than the item actually delivered (for example, charging the price of 4 x 4 ripped to 2 x 4 on a sale and delivery of 2 x 4's) except where the items ordered and delivered are non-standard sizes not specifically priced in the tables. This prohibition has no application where the buyer specifies the larger size to be ripped or resawn into items of smaller size and the resulting items are priced higher in the tables than the original larger size.

(c) *Adding commission to ceiling prohibited.* It is unlawful for any person to charge, receive or pay a commission for the service of procuring, buying, selling or locating lumber, or for any related service (such as "expediting") which does not involve actual physical handling of lumber, if the commission plus the purchase price results in a total payment by the buyer of lumber which is higher than the maximum price of the lumber. For purposes of this regulation, a commission is any service charge or payment which is figured either directly or indirectly on the basis of the quantity, price or value of the lumber in connection with which the service is performed.

(d) *Combination grades.* Lumber sold on combination grades for which no specific price is established in the regulation may not be sold above the maximum price for the lowest priced grade actually named in the combination. For example, the maximum price for lumber sold as No. 2 Common and better is the maximum price fixed for No. 2 Common lumber. But it is permissible to quote a grade with specified percentages of higher grades: *Provided*, That when the lumber is shipped, lumber of each grade is tallied on a board foot basis and invoiced separately at prices not in excess of ceiling prices for the respective grades. Note, however, that it is a violation to insist on the buyer taking grades he does not want in order to get the grades he does want.

SEC. 17 *Adjustable pricing.* Any person may offer or agree to adjust or fix prices to or at prices not in excess of the maximum prices in effect at the time of delivery. In an appropriate situation, where a petition for amendment requires extended consideration, the Price Administrator may, upon application, grant permission to agree to adjust prices upon deliveries made during the pendency of the petition, in accordance with the disposition of the petition.

ARTICLE IV—MISCELLANEOUS

SEC. 18 *Petitions for adjustment or amendment*—(a) *Government contracts.* (1) The term "government contract" is used here to include any contract with the United States or any of its agencies, or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to promote the defense of the United States". It also includes any subcontract under this kind of contract.

(2) Any person who has entered into or proposes to enter into a "government contract" and who believes that a maximum price in this regulation impedes or threatens to impede production of Northeastern softwood lumber essential to the war program and which is or will be the subject of the contract, may file an application for adjustment in accordance with Procedural Regulation 6,[4] issued by the Office of Price Administration.

(3) As soon as the application is filed, contracts, deliveries, and payments may be made at the requested price subject to refund if the requested price is disapproved or lowered. The seller must tell the buyer that the delivery is made subject to such refund.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance

[2] 7 F.R. 5059, 7242, 8829, 9000, 10530; 8 F.R. 3846

[4] 7 F.R. 5087, 5664.

with the provisions of Revised Procedural Regulation 1,[1] issued by the Office of Price Administration.

SEC. 19 *Enforcement*—(a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided for by the Emergency Price Control Act of 1942, as amended.

(b) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. Persons who make sales covered by this regulation to war procurement agencies, however, are subject to all the liabilities imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies.

SEC. 20 *Licensing.* All sellers under this regulation, except mills, are licensed by Supplementary Order 18. This order, in brief, provides that a license is necessary except for mills to make sales under this regulation. A license is automatically granted to all sellers making these sales. It is not necessary to apply specially for the license, but a registration may later be required. The Emergency Price Control Act of 1942, as amended, and Supplementary Order 18 tell the circumstances under which licenses may be suspended. The license cannot be transferred.

SEC. 21 *Grades, services and extras not listed*—(a) If a seller wishes to sell a grade of Northeastern softwood lumber which is not specifically priced in the price tables, or wishes to make an addition for special workings, specifications, services, or other extras for which additions are not specifically permitted, he must apply to the Lumber Branch of the Office of Price Administration, Washington, D. C., for a maximum price. He must submit the following information: (1) the requested price; (2) a complete description of the material to be priced; and (3) the price differential between it and the most comparable item priced in the price tables between January 1 and August 1, 1941, from the seller's own records, or if that is impossible, from the experience of the trade. If no established price differential existed, detailed analysis of comparable value should be furnished.

(b) As soon as the request has been filed, quotations and deliveries may be made at the requested price, but final payment may not be made until the price has been approved. Action on the request may be by letter or telegram. If the Office of Price Administration has not acted within 30 days of the receipt of the request, the requested price is approved.

(c) The term "lumber" as used in this section does not include: (1) glued stock, (2) stock mine material, (3) switch, cross, or mine ties, (4) posts, poles, and piling, (5) Small dimension stock, and (6) millwork.

ARTICLE V—APPENDIX A: SQUARE-EDGE WHITE PINE: PRICE TABLES

SEC. 22 *Application of Appendix A.* This Appendix applies to domestic Northeastern white pine lumber processed square edge (i. e., sawn or processed square on four sides), and to imported Northeastern white pine lumber processed square edge shipped from mills located in that part of the Dominion of Canada east of the Province of Ontario, where sold on the specifications and on the grades designated below. (Maximum prices for Northeastern white pine lumber shipped from mills located in that part of the province of Ontario lying east of the 85th Meridian, known as Ottawa Valley White Pine, are set forth separately in Appendix F.)

SEC. 23 *Grading rules.* Grade terms in this Appendix have the meaning set forth in "Standard Grading Rules for Northern White Pine and Norway Pine" (Northeastern type) published by the Northeastern Lumber Manufacturers Association, Inc., effective January 1, 1937.

SEC. 24 *Maximum prices.* The maximum f. o. b. mill price for domestic Northeastern white pine lumber processed square edge, and the maximum base price for imported Northeastern white pine lumber other than Ottawa Valley white pine lumber processed square edge shall be as set forth below. These prices are for 1,000 feet board measure of lumber in a rough air-dried condition.

SEC. 25 *Transportation addition on imported lumber.* (For domestic transportation addition, see section 11). In the case of sales of imported Northeastern white pine lumber the amount that may be added to the maximum base price for transportation is the railroad freight from Campbellton, New Brunswick, to the point of delivery in the United States, computed on the lowest through rate. This rule applies regardless of the point of origin and whether the lumber is shipped by rail or truck. The freight may be computed on the basis of the estimated average weights set forth in Table No. 3 above, and the final amount shall be evened out to the nearest quarter of a dollar per MBM. No addition may be made to the maximum base price for duty or for any charges or fees incurred in importation.

ARTICLE VI—APPENDIX B: ROUND-EDGE WHITE PINE: PRICE TABLES

SEC. 26 *Application of Appendix B.* This Appendix applies to domestic Northeastern white pine lumber processed round edge (i. e. sawn or processed by sawing two sides without sawing or otherwise processing edges), sold on the specifications and on the grades designated below.

SEC. 27 *Grading rules.* Grade terms used herein have the meaning set forth in "Standard Grading Rules for Northern White Pine and Norway Pine" (Northeastern type), published by the Northeastern Lumber Manufacturers Association, Inc., effective January 1, 1937.

SEC. 28 *Maximum prices.* The maximum f. o. b. mill price for 1,000 feet board measure of Northeastern white pine lumber processed round edge, in a rough air-dried condition, shall be as set forth below.

SEC. 29 *Application of Appendix C.* This Appendix applies to domestic and imported Eastern spruce, Jack pine and Norway pine lumber, (except Norway pine produced in Ontario and farther west), sold on the specifications and on the grades designated below. (Maximum prices for Norway pine shipped from mills located in that part of the Province of Ontario lying east of the 85th meridian, known as Ottawa Valley Norway pine, are set forth separately in Appendix F.)

SEC. 30 *Grading rules.* Grade terms used herein have the meaning set forth in "Standard Grading Rules for Eastern Spruce and Balsam Fir," published by the Northeastern Lumber Manufacturers' Association, Inc., effective April 1, 1938, as applied to Eastern spruce and Jack pine lumber, and in "Standard Grading Rules for Northern White Pine" (Northeastern type) published by the Northeastern Lumber Manufacturers' Association, Inc., effective January 1, 1937, as applied to Norway pine lumber.

SEC. 31 *Maximum prices.* The maximum f. o. b. mill price for domestic Eastern spruce, Norway pine and Jack pine lumber and white cedar shingles, and the maximum base price for imported Eastern spruce, Norway pine (other than Ottawa Valley Norway Pine), and Jack pine lumber shall be as set forth below. These prices are for 1,000 feet board measure (or for 1,000 pieces, or for a square, where so designated) of lumber in a rough air-dried condition.

SEC. 32 *Transportation addition on imported lumber.* (For domestic transportation addition, see section 11). In the case of sales of Eastern spruce, Norway pine (other than Ottawa Valley Norway pine) and Jack pine lumber, the amount that may be added to the maximum base price for transportation is the railroad freight from Campbellton, New Brunswick, to the point of delivery in the United States computed on the lowest through rate. This rule applies regardless of the point of origin and whether the lumber is shipped by rail or truck. The freight may be computed on the basis of the estimated average weights set forth in Table No. 14 above, and the final amount may be evened out to the nearest quarter of a dollar per MBM. No additions may be made to the maximum base price for duty or for any charge or fees incurred in importation.

ARTICLE VIII—APPENDIX D: NEW ENGLAND AND IMPORTED EASTERN HEMLOCK LUMBER: PRICE TABLES

SEC. 33 *Application of Appendix D.* This Appendix applies to Eastern hemlock lumber which is shipped to the purchaser from mills located in the states of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut, and that part of the Dominion of Canada located east of the 85th meridian and is sold on the specifications and on the grades designated in this section.

SEC. 34 *Grading rules.* Grade terms used herein have the meaning set forth in the "Official Grading Rules for Hemlock and Tamarack Lumber, and White Cedar Shingles" published by the Northern Hemlock and Hardwood Manufacturers' Association, effective June 27, 1941.

SEC. 35 *Maximum prices.* The maximum f. o. b. mill price for New England Eastern hemlock lumber, and the maximum base price for imported Eastern hemlock lumber shall be as set forth below. These prices are for 1,000 feet board measure of lumber in a rough air dried condition.

ARTICLE I—PROHIBITION AND SCOPE OF REGULATION

SECTION 1 *Over-ceiling prices prohibited.* On and after April 21, 1943, regardless of any contract or other obligations, no person shall sell or deliver, and no person shall buy in the course of trade or business, any Northeastern hardwood lumber for direct mill shipment at prices higher than the maximum prices fixed by this regulation, and no person shall agree, offer, or attempt to do any of these things.

SEC. 2 *Less than maximum prices.* Prices lower than the maximum prices may, of course, be charged and paid.

SEC. 3 *Lumber in transit.* If lumber has been received before April 21, 1943, by a carrier, other than one owned or controlled by the seller, for shipment to a buyer, that shipment is not subject to this regulation. It remains subject to the terms of the General Maximum Price Regulation.

SEC. 4 *What transactions are covered*—(a) *Direct-mill shipments.* This ceiling applies to all shipments originating at a mill, no matter who the seller is, and no matter whether he usually is known as a mill, concentrator, wholesaler, retailer or anything else. It does not apply to sales out of distribution yard stock. A shipment is regarded as originating at a mill if the lumber reaches the purchaser without ever becoming an integral part of the stock of a distribution yard. A sale is considered a sale out of distribution yard stock only if the lumber was a part of regular yard stock at the time the sale was made.

(b) *How to tell a mill from a distribution yard*—(1) *General tests.* The term "mill", as used here, covers what are known in the trade as sawmills, planing mills and concentration yards. Three types of establishments are described below: the first, (i), a typical sawmill or planing mill; the second, (ii), a typical concentration yard; and the third, (iii), a typical distribution yard. An establishment which resembles a typical sawmill or planing mill or a typical concentration yard more than it does a typical distribution yard is considered a mill; and one which resembles a typical distribution yard more than it does a typical sawmill or planing mill or a typical concentration yard is considered a distribution yard.

(i) A "typical sawmill or planing mill" is an establishment which is chiefly engaged in manufacturing lumber from logs or rough lumber by sawing or planing; which is located in or near a lumber producing area; which makes and sells Northeastern hardwood lumber.

(ii) A "typical concentration yard" is an establishment which concentrates and prepares lumber for commercial shipment; which keeps in stock mostly Northeastern hardwood lumber; which has its lumber brought in chiefly in rough green form by truck from small local sawmills and sells chiefly for rail shipment; and which has been located at its particular site to be near the lumber producing area.

(iii) A "typical distribution yard" is a wholesale or retail lumber yard which gets lumber from mills or other yards; unloads, sorts, stores, and resells or redistributes it; which regularly maintains a varied stock of lumber from different regions; which gets its lumber mostly by rail and sells mostly for truck shipment; which is equipped to make quick deliveries of many different items of lumber; and which has been located at its particular site in order to be near a lumber consuming area.

(2) *New yards.* In order to prevent violation of this regulation by unnecessarily routing through yards, the Office of Price Administration will not recognize distribution yards set up after April 21, 1943, unless the new yard writes to the Office of Price Administration, Washington, D. C., and proves that it satisfies the requirements of the definition and that the purpose is not to get around this regulation by means of unnecessary yard business. Until approval is received, the new yard cannot consider itself a distribution yard for the purpose of this regulation.

SEC. 5 *What products are covered.* (a) This regulation covers all Northeastern hardwood lumber, whether the grades, sizes and specifications are specifically named in the price tables or not. All grade terms have the meaning given in the "Rules for the Measurement and Inspection of Hardwood Lumber" issued by the National Hardwood Lumber Association, effective January, 1943.

(b) This regulation covers, under the name of "Northeastern hardwood lumber", all lumber produced from the following botanical species, and processed into lumber at mills located in the Northeastern hardwood area: tough white ash (Fraxinus americana), beech (Fagus americana), hard maple (Acer saccharum), yellow poplar (Liriodendron tulipifera), and the commercial species of the genera basswood (Tilia), birch (Betula), soft elm (Ulmus), soft maple (Acer), chestnut (Castanea dentata), hickory (Hicoria), cherry (Prunus), and oak (Quercus).

(c) The "Northeastern hardwood area" includes the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, all of the state of Maryland except the counties of Garrett, Allegany, Washington, and Frederick, and the Dominion of Canada east of the 85th meridian.

SEC. 6 *What persons are covered.* Any person who makes the kind of sale or purchase described above, for himself or others, is subject to this regulation. The term "person" includes an individual, corporation, partnership, association, or any other organized group; their legal successors or representatives; the United States, or any Government, or any of their political subdivisions, or any agencies of the foregoing.

SEC. 7 *Relation to other regulations*—(a) *General Maximum Price Regulation.*[1] Any sale or delivery covered by Maximum Price Regulation No. 368 is not subject to the General Maximum Price Regulation.

(b) *Revised Maximum Export Price Regulation.*[2] The maximum price for export sales of Northeastern hardwood lumber is governed by the Revised Maximum Export Price Regulation.

ARTICLE II—HOW TO FIGURE MAXIMUM F. O. B. MILL AND DELIVERED PRICES

SEC. 8 *Basic prices.* The maximum f. o. b. mill prices for domestic Northeastern hardwood lumber are set forth in Appendices A and B and for imported Northeastern hardwood lumber, in Appendix C.

SEC. 9 *Deductions for cash.* If cash is paid, the maximum price must be reduced by the seller's October, 1941, cash discount. For example, if this discount was 2% and the maximum price without cash discount is $30, the maximum price when cash is paid is $29.40. Exception: on specific written allocations issued by the Office of the Chief of Engineers, War Department, the terms 30 days net may be used by the seller regardless of his established practice.

SEC. 10 *Retail type sales excepted.* A "retail type" direct-mill sale is not subject to this regulation. A "retail type" direct-mill sale means a sale of not more than 2,000 feet of lumber in which the purchaser requests delivery to a point not more than 20 miles from the mill at which the shipment originates. It

includes only sales of lumber to contractors or consumers for use in construction, remodeling, repair, maintenance, fabrication, or remanufacture, and it does not include sales for resale in substantially the same form. "Retail type" direct-mill sales remain subject to the General Maximum Price Regulation.

SEC. 11 *Transportation additions: domestic*—(a) *Private truck.* Where a domestic shipment is exclusively by motor vehicle owned or controlled by the seller, the addition to the f. o. b. mill prices for transportation may be no greater than the actual cost to the seller of delivery by motor vehicle; and in no event shall the charge exceed the rail carload rate for the most nearly comparable haul applied to the quantity actually shipped.

(b) *Common or contract carrier.* For common or contract carrier shipments, the maximum transportation addition shall be either the rate times the estimated weights in Appendix D, or the actual amount paid to the carrier. When estimated weights are used, the delivered price shall be evened out to the nearest quarter-dollar per 1,000 feet.

(c) *Truck delivery after rail haul.* Where the shipment is by rail followed by truck delivery, the amount added for transportation may include, in addition to the amount added for rail transportation, the actual cost of truck delivery.

(d) *Trucking to rails.* Where a truck haul precedes the rail haul, as where a mill located aw .y from a railhead hauls lumber by truck to the railhead, no addition may be made for the truck haul. However, in the following three cases a mill may apply to the Lumber Branch of the Office of Price Administration, Washington, D. C., for special permission to make an addition:

(1) Where the mill was located away from rail connections because it specialized in water-borne lumber, and where shortage of shipping has forced it to operate by rail;

(2) Where the mill prior to the shortage of tires and gasoline shipped lumber to the particular final destination principally by all-truck haul, and now wishes to convert to truck-and-rail haul to save tires and gasoline;

(3) Where a mill's rail connection has been abandoned since September 5, 1941.

(e) *Transportation to planing mill.* Where the lumber is shipped by rail from a mill having milling-in-transit arrangements with a carrier to a planing mill, owned by the same person, for further processing before delivery to the purchaser, that person may apply for permission to figure transportation charges on the basis of the through rail freight rate from the first mill to final destination in the following case:

(1) Where the hurricane of September, 1938, damaged and destroyed a substantial portion of the timber near which the joint sawmill and planing mill operation had been located, so that the operator has been compelled to rely primarily on more distant sources of timber and has moved the sawmill near the source of supply; and

(2) Where it has not been practicable to move the planing mill because of excessive moving costs, shortages of mill labor and insufficient standing timber in any single location.

The application should be made by letter to the Lumber Branch, of the Office of Price Administration, Washington, D. C., and may be acted upon by letter. The addition may not be made on quotations or sales until permission has been received.

SEC. 12 *Transportation additions for imported lumber.* In the case of sales of imported lumber the transportation charges that may be added to the maximum basic prices are specifically set forth in Article VII, Appendix C.

SEC. 13 *Mixed cars.* The following additions per M may be made where the purchaser (or purchasers, in the case of a pool car) orders an item consisting of one species, thickness and grade, in the following quantities:

Quantity ordered:	Addition per M
3,000 to 4,000 ft	$1.00
2,000 to 2,999 ft	2.00
1,000 to 1,999 ft	2.50
999 ft. and less	3.00

ARTICLE III—SPECIFIC DUTIES AND PROHIBITED PRACTICES

SEC. 14 *What the invoice must contain*—(a) *General.* Because of the large number of possible additions to the basic maximum prices, it is necessary that some of them be separately shown on the invoice. Otherwise the purchaser and the Office of Price Administration could not tell in many cases whether a price which appeared to be above the ceiling was legal or not. Failure to invoice properly is just as much a violation of this regulation as charging an excessive price.

(b) *Basic price.* All invoices must contain a complete description of the lumber to show whether the price is proper or not. Any working, specification, or extra which affects the maximum price must be mentioned in the description. The amount added for these does not have to be separately shown.

(c) *Transportation charges.* In delivered sales, the invoice must contain the:

(1) Point of origin of shipment;

(2) Destination;

(3) Rail rate, (if estimated weights are used; otherwise the actual amount added for transportation); and in the case of the sales of imported lumber, the method of calculation of the freight addition;

(4) The words "direct-mill shipment".

(d) *Delivery and custom milling or kiln drying charges.* Any separate charge which the seller is permitted to make for the following must be separately shown on the invoice:

(1) Truck delivery after rail haul, or trucking to railhead.

(2) Custom milling or kiln drying. The invoice of the custom mill or kiln must be attached to the lumber invoice of the seller.

(e) *Different freight rates.* When a single order, for which a single flat delivered price was quoted and accepted, is shipped from two or more mills to a single destination on varying freight rates, the seller may average-out the transportation charges. For example, if a wholesaler bids $33.00 per MBM on a single order of a hundred thousand feet of lumber, the ceiling price being $30.00 per MBM and the estimated freight $3.00, he can ship half of it on a rate resulting in a $2.00 freight charge and half on a rate resulting in a $4.00 freight charge. Where this practice is adopted, the seller must observe all of the following conditions:

(1) Each invoice must state that the particular shipment is part of a larger order and identify the order. It must also show the individual rates for each shipment or delivery.

(2) The transportation charges which may be made and collected for each shipment or delivery, on account, must not exceed the average transportation charge figured on the entire order or the actual transportation charge for the particular shipment based upon the permitted estimated weights, whichever is lower.

(3) Upon completion of the order the seller must render a final invoice showing the individual f. o. b. mill prices separately, the amount shipped from each mill, the freight charge for each shipment, and a reconciliation of the total amount so computed with the agreed delivered selling prices and also with the maximum prices permitted by this regulation. Final payment and all necessary adjustments between buyer and seller are to be made upon the final reconciliation.

SEC. 15 *Records.* All sellers of Northeastern hardwood lumber must keep records which show a complete description of items of lumber sold, the name and address of the buyer, the date of the sale and the price. Buyers must keep similar records, including the name and address of the seller. These records must be kept for any month in which the seller or buyer sold or bought 5,000 feet board measure or more of Northeastern hardwood lumber. They must be kept for two years for inspection by the Office of Price Administration.

SEC. 16 *Prohibited practices*—(a) *General.* Any practice which is a device to get the effect of a higher than ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price.

(b) *Specific practices.* The following are some of the specific practices prohibited.

(1) Getting the effect of a higher price by changing credit practices from what

they were in October 1941. This includes decreasing credit periods or making greater charges for extension of credit. In any case, on sales made through the Office of the Chief of Engineers, War Department, terms of 30 days net may be used.

(2) Refusing, without good reason, to ship lumber in standard grades and on grade-rule range widths and lengths.

(3) Breaking up a transaction into small orders or small deliveries in an attempt to take it out of this regulation.

(4) Grading as a special grade lumber which can be graded as a standard grade; wrongly or falsely grading or invoicing lumber in any way.

(5) Making additions for special specifications, services, or other extras which are not specifically permitted.

(6) Unnecessarily routing lumber through a distribution yard.

(7) Quoting a gross price above the maximum price, even if accompanied by a discount the effect of which is to bring the net price below the maximum.

(8) Making the buyer take something he does not want in order to get what he does want; for example, making a buyer who orders No. 2 Common take all the upper grades that develop.

(9) Getting a higher price by charging the buyer for ripping or resawing, or charging on the basis of an original size larger than the item actually delivered except where the items ordered and delivered are non-standard sizes not specifically priced in the tables.

(c) *Adding commission to ceiling prohibited.* It is unlawful for any person to charge, receive or pay a commission for the service of procuring, buying, selling or locating lumber, or for any related service (such as "expediting") which does not involve actual physical handling of lumber, if the commission plus the purchase price results in a total payment by the buyer of lumber which is higher than the maximum price of the lumber. For purposes of this regulation, a commission is any service charge or payment which is figured either directly or indirectly on the basis of the quantity, price or value of the lumber in connection with which the service is performed.

SEC. 17 *Adjustable pricing.* A price may be made adjustable to the maximum price in effect at the time of delivery. In an appropriate situation, where a petition for amendment requires extended consideration, the Price Administrator may, upon application, grant permission to agree to adjust prices upon deliveries made during the pendency of the petition in accordance with the disposition of the petition.

ARTICLE IV—MISCELLANEOUS

SEC. 18 *Petitions for adjustment or amendment*—(a) *Government contracts.* (1) The term "government contract" is used here to include any contract with the United States or any of its agencies, or with the government or any governmental agency of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to promote the defense of the United States". It also includes any subcontract under this kind of contract.

(2) Any person who has entered into or proposes to enter into a "government contract" and who believes that a maximum price in this regulation impedes or threatens to impede production of Northeastern hardwood lumber essential to the war program and which is or will be the subject of the contract, may file an application for adjustment in accordance with Procedural Regulation 6,[3] issued by the Office of Price Administration.

(3) As soon as the application is filed, contracts, deliveries, and payments may be made at the requested price subject to refund if the requested price is disapproved or lowered. The seller must tell the buyer that the delivery is made subject to such refund.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation 1,[4] issued by the Office of Price Administration.

SEC. 19 *Enforcement.* (a) Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided for by the Emergency Price Control Act of 1942 as amended.

(b) War procurement agencies and their contracting or paying finance officers are not subject to any liability, civil or criminal, imposed by this regulation. Persons who make sales covered by this regulation to war procurement agencies, however, are subject to all the liabilities imposed by this regulation. "War procurement agencies" include the War Department, the Navy Department, the United States Maritime Commission and the Lend-Lease Section in the Procurement Division of the Treasury Department, or any of their agencies.

SEC. 20 *Licensing.* All sellers under this regulation, except mills, are licensed by Supplementary Order 18. This order, in brief, provides that a license is necessary except for mills to make sales under this regulation. A license is automatically granted to all sellers making these sales. It is not necessary to apply specially for the license, but a registration may later be required. The Emergency Price Control Act of 1942, as amended, and Supplementary Order 18 tell the circumstances under which licenses may be suspended. The license cannot be transferred.

[3] 7 F.R. 5087, 5664.
[4] 7 F.R. 8961, 8 F.R. 3313, 3533.

SEC. 21 *Grades, specifications and extras not specifically priced.* (a) Northeastern hardwood lumber, sold on special grades or specifications, or with special services or other extras not specifically mentioned in Appendices A, B, and C is nevertheless subject to this regulation. The maximum price is a price which bears the October 1941 relation to the most comparable standard item. The seller should find his price difference between the special item and this most comparable standard item in October 1941 or the first month before that in which he had sales of both items, or if this is impossible, the price differential he would have used. This difference is then added to or subtracted from the maximum price of the comparable standard grade, and the result is the maximum price for the special grade. This price must be reported to the Office of Price Administration, Washington, D. C., on OPA Form 675–1, given in paragraph (d) below, within 30 days from the date of entering into the contract for sale of the special grade. The reported price may be ordered reduced, if it is found to be excessive. But if the price is not disapproved within 30 days of the receipt of the report, it is approved.

(b) A seller using this pricing section can go ahead with delivery of the lumber and collection of the price he has computed or requested. But he must tell the buyer that the price is subject to revision within the thirty-day period, and, if the price is ordered reduced, must refund any excess over the final approved price.

(c) For the purposes of this section the term Northeastern hardwood lumber shall include all items of lumber in the species set forth in paragraph (b) of section 5, but shall not include the following items: (The term "items" includes specifications, workings, services, and/or extras.)

(1) Glued stock.
(2) Moulding.
(3) Shiplap.
(4) Risers, step treads, thresholds, handrails.
(5) Bevel drop siding.
(6) Flooring.
(7) Switch, cross, and mine ties.
(8) Mine material.
(9) Small dimension stock.
(10) Lath.

80% and Better Clear. The grade "80% and Better Clear" is a trade practice grade of New England Hardwood Turning Squares, in which not less than 80% of the length in the aggregate is "clear". Other specifications are the same as in the grade "90% and Better Clear".

Red Heart. The grade "Red Heart (80% and Better Clear)" is the same as the grade "90% and Better Clear" except that sound red heartwood is admitted.

Mill Run or Log Run. The grade "Mill Run" or "Log Run" is defined as the full product of the log; all bars 48" long; no bar to contain less than 24" of clear lumber. Other specifications are the same as in the grade "90% and Better Clear".

NOTES ON 1" ROUND EDGE HARDWOODS

These maximum prices for "log run" and "mill run" shall be applicable only in case the seller guarantees to the buyer that the shipment shall meet the following requirements:

Log run: Not more than 45% No. 2 Common and not less than 15% FAS.

Mill run: Not more than 40% No. 3 Common, not more than 25% No. 2 Common and not less than 10% FAS.

The maximum price of round-edge mixed hardwoods sold on a "log-run" or "mill run" basis shall be the "log run" or "mill run" price of the lowest-priced species included.

For items thicker than 1" in each species, add to the above prices the same amounts by which the prices for those thicknesses, in square-edge lumber grades, exceed the prices for 1" stock in the same square-edge lumber grades.

SEC. 24 *Kiln-drying additions—(a) To 8 percent.*

(c) *To 20 percent.* The following additions per 1000 feet may be made for kiln drying the lumber to a moisture content greater than 12 percent but not exceeding 20 percent as of the time the lumber leaves the kiln: One-half of the addition permitted in subparagraph (a) above, except that a minimum of $4.00 per 1000 feet may be charged.

(d) *For inspecting, grading and measuring after kiln drying.* Where, at the request of the purchaser, the seller inspects, grades and measures the lumber after kiln drying, an addition may be made of 5 percent of the f. o. b. mill rough air dried price of the lumber.

(e) *Custom kiln drying.* Where Northeastern hardwood lumber is kiln dried for the seller through a custom kiln and such custom kiln is not owned or operated by, or connected with, the saw mill, the seller may add the actual cost of this custom kiln drying. The amount added may not be higher than the custom kiln's maximum price established by Maximum Price Regulation No. 165, as amended [1]—Services—for such kiln drying.

The amount added may not be higher than the custom milling establishment's maximum price established by Maximum Price Regulation No. 165, as amended, [1] Services—for such milling.

SEC. 26 *Anti-stain treatment.* An addition of 50 cents per MBM may be made when lumber is anti-stain treated.

SEC. 27 *National Hardwood Lumber Association inspection certificate.* Where the purchaser requests an inspection by, and an inspection certificate issued by, the National Hardwood Lumber Association, the seller may make an added charge which does not exceed the inspection fees and expenses charged by the Association to the seller and shown on the certificate.

SEC. 28 *Green lumber.* The maximum f. o. b. mill price for 1000 feet of Northeastern hardwood lumber in a rough green condition shall be the maximum price established in this regulation for rough air-dried lumber, less the amount which the seller customarily deducted during the last six months of 1941 for furnishing green rather than air-dried stock.

SEC. 29 *Combination grades or species*—(a) *General.* For Northeastern hardwood lumber sold on "Log run", "Mill run", or "No. 1 Common and better" grade for which no specific maximum price has been established in the price tables, the maximum price shall be the maximum price established in the table for the lowest grade of lumber contained in the stock that is sold on the special inspection grade. The seller, however, may grade and ship the lumber on the standard grades included in the special inspection grade and invoice the footage in each of the standard grades at a price not to exceed the maximum price established in this regulation for the respective standard grades.

(b) *No. 1 Common and selects.* If lumber subject to this regulation is sold on a grade of No. 1 Common and selects, and if no specific maximum price has been established for this grade in the tables, $2.00 may be added to the maximum price for No. 1 Common.

(c) *Mixed hardwoods.* The maximum price for mixed hardwoods in a specified grade and thickness shall be the price of the same grade and thickness for the lowest-priced species included.

Table III. Former Provisions of Revised Supplementary Regulation No. 4.
Table IV. Provisions of Revised Supplementary Regulation No. 12.

Article I—Explanatory and General Provisions

SECTION 1. 1 *What this regulation covers.* Exceptions of commodity transactions from the General Maximum Price Regulation are collected in this regulation. It brings together, restates and reclassifies the exceptions of commodity transactions (other than those which have become obsolete) previously contained in § 1499.9 of the General Maximum Price Regulation and in Supplementary Regulation No. 1 (Exceptions for Certain Commodities, Certain Sales and Deliveries, and Certain Services) and Revised Supplementary Regulation No. 4 (Exceptions of Sales to United States Agencies). It incorporates two exceptions which are also stated in Revised Supplementary Regulation No. 12 (Sales and Deliveries of Imported Commodities). This regulation does not, as of the date issued, make any new exception or terminate or otherwise change the operative effect of any of these exceptions but merely consolidates and continues them in effect. Other exceptions of commodity transactions may be added from time to time.

SEC. 1. 2 *What this regulation does not cover.* This regulation being limited to exceptions from the General Maximum Price Regulation, does not incorporate exceptions which are stated in other price regulations. The commodity transactions listed in subsequent articles of this regulation, while excepted from the General Maximum Price Regulation, are of course subject to any other price regulations which apply to them. Services excepted from the General Maximum Price Regulation are not within the scope of this regulation but are collected in Revised Supplementary Regulation No. 11. Those service exceptions formerly contained in Supplementary Regulation No. 1 and Revised Supplementary Regulation No. 4 are being transferred to Revised Supplementary Regulation No. 11 simultaneously with issuance of this regulation.

SEC. 1. 3 *Regulations revoked.* Supplementary Regulation No. 1 and Revised Supplementary Regulation No. 4, being superseded by this regulation, are hereby revoked. Supplementary Regulation No. 7, being obsolete, is also hereby revoked. § 1499.9 of the General Maximum Price Regulation is not being revoked but is being amended simultaneously herewith so as to remove therefrom the exceptions now incorporated herein.

SEC. 1. 4 *Cross-reference to superseded provisions.* Tables are set forth in Appendix A of this regulation, showing the counterpart in this regulation or elsewhere of the exceptions heretofore contained in § 1499.9 of the General Maximum Price Regulation and in Supplementary Regulations Nos. 1, 4 (revised) and 7 and also the exceptions incorporated herein from Revised Supplementary Regulation No. 12. Reference in any price regulation or other document to any such provision shall be deemed reference to its counterpart, if any, in this or any other regulation.

SEC. 1. 5 *Definitions.* Terms used in this regulation shall, unless differently defined herein or unless the context requires a different meaning, have the same meaning as when used in the General Maximum Price Regulation.

Article II—Exception of Specific Commodities

SEC. 2. 1 *Basis of classification in this article.* The exceptions stated in this article, classified according to commodity group, are those which are based primarily upon the identity or character of the commodity or class of commodities rather than upon the nature of the transaction or of the parties thereto.

SEC. 2. 2 *Exception granted.* Sales and deliveries of the commodities set forth in subsequent sections of this article are excepted from the General Maximum Price Regulation either absolutely or, where the exception is qualified, under the conditions and to the extent indicated.

SEC. 2. 3 *Foods, feeds and beverages.* The exception stated above in Section 2. 2 extends to the following:

(a) Green coffee sold in Puerto Rico.

(b) Rum, liqueurs, cordials, bitters and other spirituous liquors produced in any territory or possession of the United States: *Provided, however,* That this exception shall not apply (1) to sale of such commodities within the territory or possession of origin nor (2) to sale by the importer of such commodities unless the invoice issued in connection with the sale states clearly and legibly on its face that the commodity is not subject to Office of Price Administration price ceilings.

(c) Citrus fruit segments or pieces, whether or not hermetically sealed in containers; citrus juices or blends thereof, whether or not hermetically sealed in containers; citrus concentrates, citrus pulp, citrus marmalade base, crushed citrus fruit and shredded, minced, sliced or diced citrus fruit or citrus peel (except candied or sugared peel), whether or not hermetically sealed in containers.

(d) All milk products, including butter, cheese, condensed and evaporated milk, powdered milk, casein, malted milk powder and any other commodity which is processed or manufactured from cow's milk and composed of milk ingredients constituting more than fifty per cent by weight or volume; but this exception shall not extend to fluid milk or cream sold at wholesale or retail, nor to ice cream, nor to ice cream mix for which adjusted maximum prices are established in § 1499.73 (a) (1a) of Supplementary Regulation No. 14. The term "sold at wholesale," as here used, refers to the sale, by any person, of fluid milk or cream in bottles or paper containers, to any person, including an industrial or commercial user, other than the ultimate consumer.

(e) Sliced and peeled apples.

(f) Dried apple pomace, i. e., the sound dried residue obtained by removing cider from apples.

(g) Bland apple syrup, i. e., the product obtained by removing or neutralizing the malic acid from pure apple juice, and concentrating, after slightly reacidifying, by heating under reduced pressure to the extent that the product meets a minimum test of 40 degrees Baumé.

(h) Eggs and poultry.

(i) Fresh fish and sea food and game.

(j) Leaf tobacco (whether dried or green); stemmed tobacco leaf irrespective of cutting incidental and preliminary to stemming or cigar making; and tobacco stems sold as such.

(k) All nuts.

(l) Linseed oil.

(m) Mixed seeds for house pet birds.

(n) Animal and poultry tonics, condiments, medicants and other special foods not used as the entire normal or customary diet for animals or poultry but for necessary special treatment or care.

(o) Ground grain feed, i. e., grains and seeds which are pulverized, cracked, crushed or otherwise milled to prepare the whole grains and seeds for use only as animal feeds.

(p) The following products when neither further processed nor packaged. The term "packaged," as here used, means packaged for sale at retail, in a container holding three pounds or less, provided such packaging takes place before delivery to the retail establishment. MEMORANDUM OPINION AND ORDER OF THE DIRECTOR

In the matter of the Petition of District Board No. 2 for a change in minimum prices and price classifications established for size groups 1 and 2 for rail shipments for the coals of the Midland Mine, Mine Index No. 148 in District No. 2.

On March 19, 1943, 8 F.R. 3569, a memorandum opinion and order were made and entered by the Director in the above entitled proceeding establishing an "A" price classification for coals in Size Groups 1 and 2 produced by Pittsburgh Coal Co., a code member in District 2, at its Midland Mine (Mine Index No. 148), for rail shipment to all Market Areas, in lieu of the presently effective "C" classification for such coals, as prayed for in the petition herein.

On March 31, 1943, Bituminous Coal Consumers' Counsel filed a motion for reconsideration and modification of the memorandum opinion and order, and requested that relief be denied. The motion for reconsideration is hereby granted.

The memorandum opinion and order recite that upon the basis of the entire record in this proceeding the requested reclassification should be granted. In arriving at this conclusion, full consideration of the brief filed by Consumers' Counsel was afforded. Failure to make specific mention of the filing of the brief was an inadvertence. The contentions urged in the brief are reiterated in the motion for reconsideration and modification.

It should be observed at the outset that the only evidence introduced at the hearing was that of the witness Francis Y. Casey, vice chairman of District Board 2 and a member of its Price and Classification Committee, whose testimony as a district board official, and an expert on coals produced in District 2, remained uncontroverted after examination and cross-examination by Consumers' Counsel.

Consumers' Counsel contends that no changes in the character and quality of the coal or in mining and preparation methods have been made since the establishment of prices in General Docket No. 15; that no official complaints against present price classification have been made; that there is no evidence relating to analyses; and that the evidence as to size, structure, and appearance resulted from visual inspection. As appears from the memorandum opinion and order, I find no merit in any of these contentions. Change in character, quality and in method of mining and preparing the coal was not urged by the petitioner at the hearing as a basis for reclassification. The witness Casey testified, rather, that additional information as to the character of the coal presently available to the district board was persuasive that a need for reclassification exists. The contention that there have been no official complaints against the "C" classification is refuted by the very nature of the proceeding herein. The petition of the district board is an official complaint under section 4 II (d) of the Act. Reference was made at the hearing as to analyses. The witness Casey gave testimony that "the block coals produced in this section are all approximately the same from an analytical standpoint," which was elaborated and adhered to on cross-examination. Moreover, it was specifically testified that the request for relief was not based on proximate analysis for the reason that the market for domestic coals is not relatively influenced by this factor.

Finally, the contention that "the testimony regarding size, structure, and appearance of the coal discloses that the demand for reclassification was predicated entirely upon a simple visual inspection of the coal as compared with coals produced at other mines" is not a fair and accurate summation of the evidence. The record discloses that inspections had been made over a period of several months by technical representatives of the district board. Based upon the results thereof and upon more accurate data as to the comparative factors relatively essential in an evaluation of domestic coals, as set forth in detail in the memorandum opinion and order, reclassification was requested in this proceeding.

Upon a reconsideration of the record and for the foregoing reasons I adhere to my original conclusion that the evidence adequately establishes a basis for the relief requested within the meaning of the Bituminous Coal Act of 1937. In view of the uncontroverted testimony in the record, which I credit, the pertinent factors relating to the classification of domestic coals, the character and history of the coals involved herein, and a proper appreciation of the function of district boards in the price-fixing process, I am of the opinion, and I find, that the reclassification herein ordered is necessary to comply with the standards set forth in sections 4 II (a) and (b) of the Act and to effectuate the purposes thereof.

Now, therefore, it is ordered, That the motion of Consumers' Counsel for the modification of the memorandum opinion and order entered herein on March 19, 1943, be and the same hereby is denied.

Dated: April 13, 1943.

[Docket No. A-1927]

THOMAS BROTHERS, ET AL.

MEMORANDUM OPINION AND ORDER GRANTING TEMPORARY RELIEF

In the matter of the petition of Thomas Brothers, John H. Matthews and J. W. Larson, for Permission to Mix Coals of Certain Mines in District No. 1.

An original petition pursuant to section 4 II (d) of the Bituminous Coal Act of 1937 was duly filed with this Division by the above-named parties, requesting permission to mix coals produced by Thomas Brothers at the Thomas No. 2 Mine, Mine Index No. 3570, by John H. Matthews at the Matthews Nos. 2, 3, and 5 Mines, Mine Index Nos. 3204, 2866, and 3627, respectively, and by J. W. Larson at the Larson's Mine, Mine Index No. 1654, for shipment by rail over the tipple owned by John H. Matthews at Grampian, Pennsylvania, on the Pennsylvania Railroad. This petition prayed that a temporary or preliminary order be issued granting such request and that any or all of said petitioners be permitted to mix coals which may be produced by said petitioners or any of them at the additional mine or mines that they or any of them operate in the same seam and locality, with coals produced by said petitioners, or any of them, at the above-named mines.

No petitions of intervention have been filed in this matter.

Upon the basis of the original petition filed herein, the Director is of the opinion that a reasonable showing of necessity has been made for the granting of temporary relief, as hereinafter set forth. The request for permission to mix coals to be produced at mines which said petitioners may acquire in the future, however, should be denied without prejudice to the renewal thereof, when such mines are acquired.

Now, therefore, it is ordered, That pending further order, temporary relief be, and the same hereby is, granted as follows: Commencing forthwith the schedule of effective minimum prices for District No. 1 for all shipments except truck is supplemented to include the price classifications, minimum prices, changes in shipping points and other matter appearing in Supplement R which is annexed hereto and made a part hereof.

It is further ordered, That the request for permission to mix coals to be produced at mines which said petitioners may acquire in the future be, and the same hereby is, denied without prejudice, however, to the renewal thereof, when such mines are acquired.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division pursuant to the rules and regulations governing practice and procedure before the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

No relief is granted herein for the Matthews No. 5 (S) Mine, Mine Index No. 3636 of John H. Matthews, for the reason that Mine Index No. 3636 was consolidated with Mine Index No. 3627 in Docket No. A-1719.

An order scheduling a hearing to adduce facts upon which final relief in this matter may be based will be issued in due course.

Dated: April 14, 1943.

Director.

ESSEX COUNTY COOP COMPANY

ORDER OF AMENDMENT AND SUSPENSION

This proceeding under the Packers and Stockyards Act, 1921 (7 U.S.C. 1940 ed. 181 et seq.), was instituted by an order of suspension published in the FEDERAL REGISTER on August 15, 1942 (7 F.R. 6443), which was amended by an order of inquiry and notice of hearing published on September 15, 1942 (7 F.R. 7263). Those orders are further amended by adding the following:

10. On March 19, 1943, respondent, Essex County Coop Company, Newark, New Jersey, filed Amendment No. 2 to its Tariff No. 1, to become effective April 15, 1943, the effect of which would increase its charges for rental of "poultry coops" from 58½ to 65 cents, and of "turkey coops" from 65 to 70 cents.

There being reason to believe that these proposed increases are unjustified and unreasonable, they should be suspended pending hearing and decision in this proceeding. Therefore, the amendment effecting them is suspended for a period of 30 days after it would otherwise take effect. A copy of this order shall be served on respondent by registered mail, and it shall be published in the FEDERAL REGISTER.

PART 11—NATIONAL FARM LOAN ASSOCIATIONS

MERGER OF SHAREHOLDER GROUPS

Section 11.375 of Title 6, Code of Federal Regulations, is amended to read as follows:

§ 11.375 *Procedure.* Whenever, in an association authorized to operate under section 25 (b) of the Farm Credit Act of 1937, all impairment is removed in the stock owned by shareholders in group 1, and there is no impairment in the stock owned by shareholders in group 2, such groups may merge in the manner hereinafter set forth:

(a) The board of directors of the association shall call separate special meetings of the shareholders of group 1 and the shareholders of group 2 for the purpose of considering a proposed resolution of merger in a form prescribed by the Administration. Such meetings shall be called and held in accordance with the provisions of the association's bylaws applicable to meetings of association shareholders. The notice of the meetings shall contain a statement that a merger of the two groups of association shareholders will be voted upon and should contain a brief statement of the nature and effect of the proposal. At these meetings the effect of the proposed merger should be fully explained to the shareholders.

(b) The approval of two-thirds of the shareholders present and voting at each meeting at which the resolution of merger is considered shall be requisite for the adoption of such resolution.

(c) At least three copies of such resolution shall be prepared, and, when the resolution has been duly adopted by both groups, three copies shall be forwarded to the bank.

(d) The bank may request an examination of the association either on or before the adoption of the merger resolution. An examination may be required by the Land Bank Commissioner at any stage in the proceedings if it appears necessary in the interests of the shareholders.

(e) The bank shall forward to the Administration the three copies of the resolution, a current financial statement of groups 1 and 2, and its recommendation as to whether the merger should be approved.

(f) No merger shall be effective unless or until it has been approved by the Commissioner. If the merger resolution is approved by the Commissioner, the effective date will be specified in his written approval and the bank and association will be notified of the approval and effective date by letter; and each will be sent one copy of the merger resolution for its files. Upon receipt of the approval notice the bank shall take such steps as it deems necessary to assist the secretary-treasurer of the association in consolidating the accounts and records of the two groups pursuant to the merger resolution. Such consolidation of accounts and records shall be made as of the close of business on the effective date of the merger. As soon as the merger has been completed, the secretary-treasurer shall notify each of the members of the association that the merger has been effected. A copy of that notice shall be sent to the Administration.
